National Bible Week 1955

National Bible week has been observed from October 17th through the 23rd this year. It is an annual observance which is sponsored by the National Council on Bible Week, a national organization which has helped a great deal in bringing about today's recognition of religious matters.

At the same time, many with opinions on the Bible, some who believe it is the word of God, some who believe it is the word of man, and some who believe it is the word of a spirit, are expressing their views.

These were the findings when United States Post staff reported the following opinions on the subject that shows before the Bible in the national picture.

It is the opinion of 57 percent of the nation that the Bible is the word of God. It is the opinion of 31 percent that it is the word of man, and 12 percent that it is the word of a spirit.

Tid Bits Of Kentucky Folklore

By Dr. Gordon Wynn
TID BIT—MOUND NO
When we were very young people who were merely boys and girls, we used to have a great deal of fun in the woods. We would go out to the woods and look for things that were interesting and unusual. We would go to the woods and look for things that were interesting and unusual.

When we were very young people who were merely boys and girls, we used to have a great deal of fun in the woods. We would go out to the woods and look for things that were interesting and unusual. We would go to the woods and look for things that were interesting and unusual.

WATERSON HOTEL, LOUISVILLE 2, KY.

Consolidated Tobacco Considered Better

The economics situation for tobacco is brighter than it has been in a year ago, says the Kentucky Tobacco Growers' Association. The association reports that the price of tobacco has risen to its highest level in over a year. This is due to a combination of factors, including a decrease in the supply of tobacco and an increase in demand.

After two years of declining cigarette use, the consumption of cigarettes appears to have stabilizing. The price of tobacco has risen to its highest level in over a year. This is due to a combination of factors, including a decrease in the supply of tobacco and an increase in demand.

These prospects are for the 1955 crop of tobacco to be sold for a price of \$1.25 per pound. This is a significant increase from the price of \$1.00 per pound in 1954. The price increase is due to a combination of factors, including a decrease in the supply of tobacco and an increase in demand.
