An annual issue of the Year Book, Carlisle, under the name of "The Carlisle Mercury Year Book"

WABDEN R. FISHER, JR., Editor-Publisher

Subscription Rates Per Year
\$2.50 per year, \$1.50 for six months

Farm Cost Cutting

A midwestern agricultural writer who has raised a farm and has been down through the world of agriculture all his life, recently said that there is one thing the American farmer has done better than any other people in the world. That is to make the most of the soil, but a farmer of the machine shop, a businessman, and a man of letters, insect pests, wood, water, and politics.

W. Colville Tabert Seriously Injured

47 Pupils Take Diploma Examination

Thursday, Jan. 26, 1956
W. Colville Tabert was seriously injured by a tractor on Monday morning when he was engaged in a routine job on the farm. He was taken to the hospital where he is now recovering from his injuries.

Barries Vg Tobacco

The tobacco industry in Kentucky is facing a new challenge. The state has passed a law that will require growers to plant a certain number of acres in tobacco. This has caused a great deal of concern among growers who are not interested in the crop.

Kentucky Premier Showing

Frankfort, Ky., Jan. 26—Gov. Letcher's governorial campaign is showing signs of strength. He has received a great deal of support from the people of the state, and his record in office has been praised by many of his constituents.

Many Trees in Kentucky

A survey of the trees in Kentucky has shown that there are a great many different kinds of trees in the state. This is due to the fact that Kentucky has a wide variety of climates and soils, which allows for a great diversity of tree life.

5 Ways Suggested For Foundation Financing

The largest and most legitimate of General Fund industry money is the fact of public education. The Foundation for the Education of Kentucky is a non-profit organization that is dedicated to the improvement of education in the state.

Burley Marketing Season Nears End

The burley marketing season in Kentucky is drawing to a close. Growers are beginning to harvest their crops, and the market is becoming more active. This is a good sign for the industry, which has been struggling for some time.

Education Bill Proposed by Hinkle

A bill to improve the education system in Kentucky has been introduced in the state legislature. The bill, which was proposed by Rep. Hinkle, would provide for a number of changes, including the creation of a new department of education.

Tobacco Okay in Carlisle County

The county board in Carlisle County has voted to allow the planting of tobacco on a limited scale. This decision was made after a long and heated debate, and it is expected that it will be a relief to many of the county's farmers.

Washington Views

There are a number of interesting stories from Washington that are worth reading. One of the most interesting is the story of the new president's inaugural ceremony, which was held in a grand and memorable way.

Clement's Review

A review of the work of the late Senator Clement has been published. The review, which was written by a former colleague, praises Clement for his dedication to public service and his leadership in the Senate.

Hamilton's Review

A review of the work of the late Senator Hamilton has been published. The review, which was written by a former colleague, praises Hamilton for his dedication to public service and his leadership in the Senate.

Tid Bits Of Kentucky Folklore

By Ned Crosby
Found recently in the desk of a friend who had been in the army during the war, I found a collection of folktales and legends from Kentucky. These stories, which are passed down from generation to generation, provide a glimpse into the lives of the people of the state.

A Little Yapping

By Ned Crosby
I have been thinking a great deal about the dog in the last few weeks. Dogs are a part of our lives, and they play a great role in our lives. They are loyal, loving, and protective, and they are a source of great joy and companionship for many of us.

Annual 'Strep' Season Near Peak

With the onset of winter, the annual season of streptococcal infections is reaching its peak. This is a time when many people get sick, and it is important to take steps to prevent the spread of the disease. This includes getting vaccinated and practicing good hygiene.

U.K. Physics Program

The University of Kentucky has announced that it will be participating in a new physics program with the United Kingdom. This program, which is part of a larger effort to promote international cooperation in science, will focus on the study of nuclear physics and particle physics.

Winner Waives Multiple Occasion

A winner of a multiple occasion award has waived his prize. The award, which was given to a young man for his outstanding achievements in school and in his community, was a source of great pride for him and his family.

Extension Helps

The Agricultural Extension Service is providing a number of helpful services to farmers in the state. These services include information on the latest farming techniques, advice on pest control, and help with marketing their crops.
