HOW THE G-E FILTER-FLO WASHER WORKS

The new General Electric Washer circulates and filters your wash water at the rate of six gallons per minute—to give you whiter, brighter clothes.

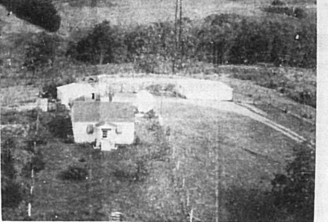

As the Filter-Flo Washing System circulates the water, sand settles on the bottom of washbasin, soap suds float away, lint is trapped in the filter.

BIG CAPACITY, TOO!

This new G-E has over 50% more clothes capacity than any other automatic. No need to split a big wash into two separate loads. Plus Water Saver Control for small loads.
