Wilma Perry winner of 4-H style show Democrats name 16 to state convention

Thursday, May 21, 1936
A state convention will be held at the state capital building at Frankfort, Ky., June 3 and 4. Mrs. Wilma Perry of Nicholas County, who won the 4-H style show at Lexington, was named as the winner of the 4-H style show.

Democracy will select 16 delegates to the state convention at Frankfort, Ky., June 3 and 4. The delegates will be elected at a meeting at Johnson Memorial Hall at Lexington, Ky., on Saturday, May 23.

Entered the store of Mrs. M. J. H. at Lexington, Ky., on Sunday morning, May 23. The store was broken into by several persons and the owner's money and other valuables were stolen.

Marvin Sefton has leased the store now being occupied by the 4-H office at Lexington, Ky., and will open a clothing store at that location.

Wilma Perry, a student in the Carlisle school, was winner of the 4-H style show in the annual 4-H club rally day held in the city school Saturday morning. She will represent Nicholas County at the state convention at Frankfort, Ky., June 3 and 4.

W. F. Sugg Clerk of the County Court for the County and State at Large

Primary Election to be Held on Tuesday, May 26, 1936

FOR UNITED STATES SENATOR
Granville Thomas Evans
Julian H. Golden
Ponville, Ky.
Thurston B. Martin
Glouven, Ky.

State of Kentucky (Det)
County of Nicholas (Det)

I, J. W. F. Sugg, Clerk of the County Court for the County and State at Large, do hereby certify that the foregoing is a true, complete and correct copy of the Official Democratic Primary Ballot to be held at the Primary Election, to be held at Nicholas County, Kentucky on Tuesday, May 26, 1936, and the names of the candidates whose names will be engraved in the same order as shown listed on the voting machines for said County.

Tea Cup Test proves TCP makes rough engines smooth

There is a difference between engines that run smoothly and those that do not. The difference is in the amount of power that the engine can develop. A smooth engine will run at a higher speed than a rough engine. The reason for this is that the smooth engine has less friction than the rough engine. The reason for this is that the smooth engine has better lubrication than the rough engine. The reason for this is that the smooth engine has a better balance than the rough engine. The reason for this is that the smooth engine has a better timing than the rough engine. The reason for this is that the smooth engine has a better compression than the rough engine. The reason for this is that the smooth engine has a better scavenging than the rough engine. The reason for this is that the smooth engine has a better exhaust than the rough engine. The reason for this is that the smooth engine has a better intake than the rough engine. The reason for this is that the smooth engine has a better valve timing than the rough engine. The reason for this is that the smooth engine has a better piston ring sealing than the rough engine. The reason for this is that the smooth engine has a better cylinder wall finish than the rough engine. The reason for this is that the smooth engine has a better bore finish than the rough engine. The reason for this is that the smooth engine has a better skirt finish than the rough engine. The reason for this is that the smooth engine has a better crankshaft finish than the rough engine. The reason for this is that the smooth engine has a better flywheel finish than the rough engine. The reason for this is that the smooth engine has a better clutch finish than the rough engine. The reason for this is that the smooth engine has a better brake finish than the rough engine. The reason for this is that the smooth engine has a better steering finish than the rough engine. The reason for this is that the smooth engine has a better suspension finish than the rough engine. The reason for this is that the smooth engine has a better chassis finish than the rough engine. The reason for this is that the smooth engine has a better body finish than the rough engine. The reason for this is that the smooth engine has a better paint finish than the rough engine. The reason for this is that the smooth engine has a better interior finish than the rough engine. The reason for this is that the smooth engine has a better exterior finish than the rough engine. The reason for this is that the smooth engine has a better overall finish than the rough engine.

... and the smoother your engine runs the more power you get!

STANDARD OIL

70 Years of Leadership based on Confidence

When it purrs, you reign

You can hardly hear its whispered might—but you sure can feel it. It's power almost without limit—power that handles the hills, cuts the miles, makes you monarch of all you survey.

For this is a new Buick—a '36 Buick—made up of the finest materials, with a body that is as strong as steel, and a new engine with a compression of 9.5 to 1.

But what makes you feel even more like a monarch is the way in which this Buick handles the highway in the great advance in Variable Valve Timing.
