How spiritual understanding of God as divine Mind opens the way to greater abilities and opportunities will be brought out at Christian Science services Sunday.
Readings in the Lesson-Sermon entitled "Mind" will include the following from "Science and Health with Key to the Scriptures" by Mary Baker Eddy (128:14): "A knowledge of the Science of being develops the latent abilities and possibilities of man. It extends the atmosphere of thought, giving mortals access to broader and higher realms. It raises the thinker into his native air of insight and perspicacity."
The Golden Text is from Romans 12:2: "Be not conformed to this world: but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect, will of God."

COMMENT

I was pleased to read that some one had thought of the animals left behind by the Hungarian refugees. In response to an appeal from the S.P.C.A. a British pet food firm sent 25 tons of food from London to Vienna to feed the pets and animals. Free air freight was provided by British European Airways.
It has been said that, "animal welfare societies are composed of sentimentalists and cranks."

During the recent snowstorm in southern California thousands of motorists drove to the mountain areas to enjoy this rarity—at the same time the heavy snow in New England sent thousands to the south to enjoy the sun.

February has been a good month if for no other reason than, that it's on the brink of Spring.
