Evening Worship Hour, 7:00. Gospel singing and evangelistic preaching.
"The Hour of Power" Wednesday evening, 7:00.
Give God A Chance. Attend Sunday School and Church as a family.

CHRISTIAN SCIENCE

How spiritual understanding of God as divine Life brings strength and freedom will be brought out Sunday at Christian Science services.

Scriptural selections in the Lesson-Sermon on "Life" will include the following from John (17:3:" And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

From "Science and Health with Key to the Scriptures" by Mary Baker Eddy will be read the following (467:27): "The understanding that Life is God, Spirit, lengthens our days by strengthening our trust in the deathless reality of life, its almightiness and immortality."

The Golden Text is from Proverbs (16:22): "Understanding is a wellspring of life unto him that hath it."

Cassidy

By Mrs. T. H. Vice

Rev. Jesse Florence and Mr. and Mrs. Gilbert Gray spent last Sunday with Mr. and Mrs. Lovell Shaw.

Mrs. Harry Vice and John, Williamsburg, Ohio, spent the weekend with Mr. and Mrs. T. H. Vice and Tommy and Mr. and Mrs. Stanley Kenney and family in Carlisle.

Mrs. Johnson Bretz spent one day recently with Mrs. Eugene Letcher and family.

Mrs. Kyde Allison was in Maysville Saturday to see her doctor. We wish for her a speedy recovery.

Mrs. Earl Letcher, Mrs. Eugene Letcher and Mrs. Tommie Vice attended homemakers at the home of Mrs. Billy Sams last Thursday.

Mr. and Mrs. Durward Curtis, Dayton, Ohio, have been recent guests of her mother, Mrs. Willie Berry.

Jimmie Letcher spent Sunday with his grandparents, Mr. and Mrs. Earl Letcher.

Alfred Bretz spent one night with his son, Herbert Bretz and family in Flria. Mr. Bretz has purchased the Howard Hamilton farm on Locust Grove and plans to move to it.

Miss Faye Letcher has returned from a weeks visit in Louisville with her brothers, Gaylord and Billy and families.

Mrs. Tommie Vice spent Tuesday with Mrs. Willie Swartz.

Glad to hear Mrs. Pearl Crawford has improved from her recent illness.

Rev. Jesse Florence will fill his regular appointment here Sunday morning at 11:00 and Sunday night at 6:30. Sunday school at 10 a.m.

W.S.C.S. will meet with Mrs. Earl Letcher Thursday (today) for an all day service.

Mrs. Mable Becker spent the weekend with her son, Jack Becker, Mrs. Becker and Jeff.

Parks 4-H Club

Ann Williams, Reporter

On Friday,' December 14 the Parks Busy Bee 4-H club met. The business was conducted by Sue Cartmill, president.

The topic of our program was "Our Agents and Leaders." The program was as follows: "The County Agent" by Patricia Sexton; "The Home Demonstration Agent" by Ann Williams; "The Assistant County Agent" by Bobby Wagoner; "The State 4-H Staff" by Lois Curtis; "The Assistant Home Demonstration Agent" by Marlene Hutchison; "The Club Leader" by Bernice Barbee.

Mrs. Wilson talked to the members about the kinds of material for dresses and aprons. Mr. Milam discussed converting a kerosene lamp into an electric lamp.

The meeting was adjourned until Jan. 10.

CHRISTMAS SEAL SALES TOTAL $434

The Tuberculosis Christmas Seal drive in Nicholas County has reached a total of $434, according to county seal chairman, Miss Kathryn Hanley.

UK strawberry testers to try spacing plans

Strawberry researchers at the UK Agricultural Experiment Station will run a check on new systems in 1957, among which will be the "hill" or spacing system.

This was tried in New York last year with success. UK testers say it might work in Kentucky.

In the hill system, plants are set in three rows, with 12 inches between plants in the row. There is a 30-inch alley between each group of three rows.

In the prevailing row system, plants are set 2 feet apart in rows, which in turn are 4 feet apart.

In the hill system, all runners are removed at two-week intervals in the row system, plants in double runners which root and form a matted row.

In the New York test, the hill averaged 4,200 quarts per acre more than the row system plots.

Carl Chaplin, UK Agricultural Experiment Station strawberry tester, said "good information" could be obtained if several Kentucky growers would try a few rows in the hill system in 1957.

VA service to save money for tax payers

A saving to taxpayers of at least $350,000 a year, with better service to veterans, will result from a new premium billing system introduced by Veterans Administration for its GI insurance operations, VA announced today.

VA said the new premium billing system involves the use of punched cards which policyholders will return with their checks in special envelopes supplied by VA for that purpose.

The punched card method is being used in order to adapt billing and accounting procedures to more modern equipment in the interest of better service to policyholders, VA said.

The VA district office in Philadelphia began sending the new punched card billings to policyholders just recently. The Philadelphia office handles the insurance records for Kentucky veterans.

BILL GILLEY is playing on the Duke University freshmen basketball team this year. Bill is a former Carlisle high school star. Through games of January 5, he had scored 58 points. (six games —average is 9.7) He is the son of Mr. and Mrs. William F. Gilley. The Blue Imps, coached by Whit Cobb and former Duke great Joe Belmont, have a 3-3 record.

Farm Facts
FOR KENTUCKY FOLKS
by Wm. C. Johnstone
AGRICULTURAL REPRESENTATIVE
KENTUCKY BANKERS ASSOCIATION

JANUARY—1957

Happy New Year. The advent of the new year found the Kentucky farmer with a "smile on his face and a jingle in his jeans." 1956 was a good year—weather conditions were exceptionally good; yields in most cases were the highest on record. Small grain yields were excellent. Corn produced an average of 46 bushels per acre—12 per cent above the previous high and almost double the yield 20 years ago. And, above all, tobacco—his main cash crop, had all "three"—good yield, fine quality and high price. The smile on the farmer's face was contageous. The country banker was happy too, and so was the merchant, because cash does not stay with the farmer long.

Tight Money—Along with a group of Kentucky bankers I recently attended the National Agricultural Credit Conference at St. Louis where credit men from all over the country met to discuss the problems of financing agriculture. There was general agreement among the bankers and financial experts on two things. First, money will be "tighter" in 1957 than in recent years. The supply of it is smaller and the demand for it is greater, which will result in slightly higher interest rates and a little more "selective" lending than in the past. And second, there will be plenty of money to finance the bank's regular customers in this area that they can use borrowed money profitable. Lenders will not be interested in putting out "risk money" this year. They will want to be assured that the loan is safe and that it will be profitable to the borrower as well as to the lender. In face of high competition for money the alert farmer will figure out his credit needs early and discuss them with his banker.

"Tight money" might even benefit the farmer. If it slows the inflationary trend that has caused the price of things that farmers buy to go up so much faster than the things that he sells it will help rather than hurt.

Complicated. One thing on which the bankers and farm experts were not in agreement was the merits of the Soil Bank. Altho they believed in the principles of taking land from cultivation to preserve it for future needs they were in disagreement as to the operation of the program and its effect upon production and prices. Many bankers upon it merely as a method of distributing cash among the farmers while others thought the program would help materially in bringing about a adjustment in supply and demand. The experts that tried to explain the program though, seemed as much confused about its operation as the farmers who are trying to put it into practice. To say the least, the program in its present form is very complicated.

Science healing lectures at Lexington

How sickness and other disorders are healed by prayer based on spiritual understanding of God will be the topic of a Christian Science lecture to be given in Lexington, Kentucky next Tuesday, Jan. 22, by Jules Bern of New York City.

Open to the public without charge, the lecture will be sponsored by the members of First Church of Christ, Scientist, Lexington. Mr. Cern will speak in Henry Clay high school auditorium at 8 p.m. His subject will be Christian Science: The Divine Solution to Every Human Problem.

Mr. Cern is on extensive tour as a member of The Christian Science Board of Lectureship. A native of Texas, he was an advertising executive for a large New York department store before turning from advertising to the theatre, he appeared in three plays on Broadway and toured most of the United States and Canada. Since 1935 he has devoted his full time to the public practice of Christian Science healing and to service of the Christian Science organization.

Because the average stalk of celery weighing about 1½ pounds provides only 75 calories, it is popular among weight-watchers.

Ky. to honor classroom teacher

In 1957 Kentucky will have a "Teacher of the Year."

This honor will be bestowed on a representative classroom teacher under the "Teacher of the Year" program conducted by the Education Committee of the Kentucky Chamber of Commerce, in cooperation with the Kentucky Education Association.

"This is a recognition program," according to William C. Embry, Louisville, Chairman of the Education Committee, "and is designed primarily to call to the attention of the public the important role that teachers play in developing the educational standards of Kentucky youth. In effect, this is an appreciation award to honor the outstanding teacher who is most representative of the teaching profession in Kentucky."

The award for the State "Teacher of the Year" will be made at the Annual Meeting of the State Chamber of Commerce next April, according to Embry. The state winner will be selected from winners in each district based on the 11 K.E.A. Districts.

The basis for the awards will be made according to (1) the academic training of the teacher; (2) special school activities; (3) community services rendered; (4) continual professional growth; (5) activities in professional organizations; (6) teacher proficiency; and (7) personal qualifications.

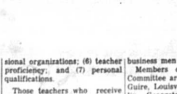
Those teachers who receive county and district awards will be presented an appropriate scroll, Embry noted. He added that the state winner will be awarded an all-expense trip to Louisville at the time of presentation and a symbolic statuette or "oscar." In most cases the selection committee will be composed of school officials and business men and women.

Members of the Education Committee are: Coleman L. McGuire, Louisville; George Sheelin, Georgetown; James V. Vittlow, Owensboro; James A. Beatley, Lexington; R. M. Porter, Henderson; Thomas A. Ballantine, Louisville; David F. Cocks, Louisville; Walter H. Girdler, Louisville; Ramsey Taylor, Princeton; John Fred Williams, Ashland; and Barney A. Tucker, London.

Dairymen See Us Before You Buy
SEE . . . TRY . . . COMPARE!

TRY! . . . a De Laval Sterling Milker Unit on your own cows. It will operate on your present milker pipeline. No obligation whatsoever.

JUDGE! . . . for yourself whether it provides all around Better Milking. If it does, you can select the type of De Laval Milker best suited to your particular needs. It will pay you to make this interesting test now.



The way you milk your cows has much to do with their production . . . and your dairy profits!

Maybe your present milker is doing a good job—or maybe not. One thing is sure, it will pay you to find out—the sooner, the better.

Here's an easy, sure way to get the FACTS for yourself and do your own deciding. Ask us to loan you a new De Laval Sterling Milker Unit. Use it—and in everyday use compare it in every way with your present milker. Check results. That's all. You're the judge—and you can do this without obligation.

If you decide that De Laval Better Milking is better for you, there are De Laval Milkers to choose from, to perfectly meet your needs.

DE LAVAL COMBINE MILKER
Milks, weighs, cleans and filters the milk in one operation. Ideal for pipe farm cows.

DE LAVAL MAGNETIC MILKER
The only milker pulsation that's magnetically controlled. Ideal for all pipelines.

DE LAVAL STERLING MILKER
Ideal quality milk-fully de Laval quality milk-fully de Laval quality milk-fully de Laval
