Notice of Hearing for Electric Rate Adjustments

The Public Service Commission of Kentucky has fixed 9:00 A.M. Daylight Saving Time (8:00 A.M. Central Standard Time) on July 29, 1957, at the Commission's office in Frankfort, Kentucky, as the time and place for hearing on general adjustments in electric rates filed by Kentucky Utilities Company in Case No. 5124. The proposed electric rate schedules in condensed form are as follows:

RESIDENTIAL

RS-1—Applicable in towns with population from 250 to 2,999.

$1.00 per month to include 10 kwhs used per month
.5¢ per kwh for the next 240 kwh.
2.5¢ per kwh for the next 250 kwh.
2¢ per kwh for all in excess of 500 kwh.

RS-2—Applicable in towns with population from 3,000 to 19,999.

$1.00 per month to include 10 kwhs used per month
.5¢ per kwh for the next 240 kwh.
2.5¢ per kwh for the next 250 kwh.
2¢ per kwh for all in excess of 500 kwh.

RS-3—Applicable in towns with population over 20,000.

$1.00 per month to include 10 kwhs used per month
.5¢ per kwh for the next 240 kwh.
2.5¢ per kwh for the next 250 kwh.
2¢ per kwh for all in excess of 500 kwh.

RS-4—Applicable in towns with population of 250 and under, and all rural territory.

$1.50 per month to include 10 kwhs used per month
.5¢ per kwh for the next 240 kwh.
2.5¢ per kwh for the next 250 kwh.
2¢ per kwh for all in excess of 500 kwh.

RS-5—Applicable in towns with population from 250 to 2,999.

$1.00 to include 10 kwhs used per month
.5¢ per kwh for the next 240 kwh.
2.5¢ per kwh for the next 250 kwh.
2¢ per kwh for all in excess of 500 kwh.

COMMERCIAL

GS-2—Applicable in towns with population from 250 to 2,999.

$1.00 to include 10 kwhs used per month
.5¢ per kwh for the next 240 kwh.
2.5¢ per kwh for the next 250 kwh.
2¢ per kwh for all in excess of 500 kwh.

GS-3—Applicable in towns with population from 3,000 to 19,999.

$1.00 to include 10 kwhs used per month
.5¢ per kwh for the next 240 kwh.
2.5¢ per kwh for the next 250 kwh.
2¢ per kwh for all in excess of 500 kwh.

GS-4—Applicable in towns with population over 20,000.

$1.00 to include 10 kwhs used per month
.5¢ per kwh for the next 240 kwh.
2.5¢ per kwh for the next 250 kwh.
2¢ per kwh for all in excess of 500 kwh.

Minimum charge on Rates GS-2, GS-3, and GS-4

$1.00 per month to include all ordinary lighting, all ordinary motor appliances, all incidental equipment of less than one horse power individual rating, plus one kilowatt demand charge per kw. in addition to that listed below. Special lighting equipment such as that not ordinarily found in residences, stores, or offices, commercial heating, or any one unit of equipment of one horse power or more shall be billed at the actual demand connected load.

Optional Yearly Minimum

Provided the customer elects to pay an annual minimum instead of the monthly minimum, an annual minimum of $12.00 per kw. for the first 10 kw plus an amount equal to $9.00 per horse power determined under the monthly minimum provisions of the rate, shall be the total annual minimum to be not less than $97.00.

GS-1—Applicable in towns with population of 250 and under, and in rural territory.

$1.50 to include 10 kwhs used per month
.5¢ per kwh for the next 240 kwh.
2.5¢ per kwh for the next 250 kwh.
2¢ per kwh for all in excess of 500 kwh.

Minimum Charge

$1.50 per month to include all ordinary lighting, all ordinary motor appliances, all incidental equipment of less than one horse power individual rating, plus 20 cents per horse power for power in addition to that listed herein. Special lighting equipment such as that not ordinarily found in residences, stores, or offices, commercial heating, or any one unit of equipment of one horse power or more shall be billed at the actual demand connected load.

Optional Yearly Minimum

Provided the customer elects to pay an annual minimum instead of the monthly minimum, an annual minimum of $18.00 per kw. for the first 10 kw plus an amount equal to $9.00 per horse power determined under the monthly minimum provisions of the rate, shall be the total annual minimum to be not less than $97.00.

LIGHTING AND POWER

Maximum Load Charge

$1.50 per month per kilowatt of maximum load in excess of 25 kilowatts.

Primary Service at nominal voltages of 2,400, 4,160, 7,200, 12,000 and 12,470 Y

$1.00 per kilowatt for the first 25 kilowatts of maximum load but not less than $25.00 per month.

$1.50 per kilowatt for all in excess of 25 kilowatts per month.

Primary Service at nominal voltages of 2,400, 4,160, 7,200, 12,000 and 12,470 Y

$1.00 per kilowatt for the first 25 kilowatts of maximum load but not less than $25.00 per month.

$1.25 per kilowatt for all in excess of 25 kilowatts per month.

Transmission Line Service at voltages of 24,900 or 69,000 as available

$1.25 per kilowatt per month for all kilowatts, but with minimum demand charge of $1,000.00 per month.

Power Factor Clause

If the average power factor of the customer's load is less than 85 percent, as determined by test or by such measurements as the Company may make from time to time, the Company reserves the right to adjust the billing demand to 85 percent of the maximum demand as indicated or recorded by the demand meter.

Primary Energy Charge of

1.5¢ per kwh for the next 1,000 kwh
1¢ per kwh for the next 9,000 kwh
.5¢ per kwh for the next 90,000 kwh
.4¢ per kwh for the next 800,000 kwh
.3¢ per kwh for the next 1,000,000 kwh
.2¢ per kwh for all in excess of 1,900,000 kwh

ADJUSTMENT CLAUSES COVERING INCREASES IN COST OF FUEL, LABOR AND TAXES

(a) The Company reserves the right to make effective R.S.-1, RS-4, RS-5, and GS-1 rates, upon the Company's having received Reports similar to the F.P.C. Operating Reports available, an additional charge of .1¢ per kwh for each .1¢ per mcf increase in the cost of fuel at the rate of .0013 cent per kilowatt-hour for each 1 cent increase in the cost of fuel. Fuel cost shall be determined on the basis of the Fuel clause 21 cents per 1,000,000 BTU.

(b) The average wage rate of production workers in electric light and power utilities, as compiled by the Bureau of Labor Statistics for the next succeeding month, as published in the Survey of Current Business, exceeds $2.00 per hour an additional charge will be made for each 1¢ per hour increase in the wage rate at the rate of .0025 of 1¢ per kilowatt-hour for each 1 cent, or fraction thereof, increase above $2.00 per hour.

Tax Clause

The effective date of the imposition of any new or increased tax, charge or levy of governmental authorities imposed upon the Company's sale of electric energy under R.S.-1, RS-4, RS-5 and GS-1 rates, upon the Company's income or receipts therefrom, the Company reserves the right to adjust all billing for electric energy rendered within the limits of such new or increased tax, charge or levy to reflect the increase in the amount of such tax, charge or levy.

The company also proposes to eliminate several rate schedules. Customers being served under these rates will be contacted individually by the company's personnel. Standard schedules are also available to be canceled by the customer at any time. These rates are with respect to the cities of Paris, Danville, and Ivel plants.

Rate Schedules P-1, P-2, and P-3 and Special provision to Paducah, General Power Rate 21, and rider No. 1 to General Service Rate GS-1.

General Service Rate GS-1-S, applicable in Paris.

Commercial Off-peak Water Heating Rate, applicable to Paris, Nicholasville, Versailles, Harrodsburg, Shelbyville, Georgetown, Lawrenceburg, Frankfort, Owensboro, Hopkinsville, Central City, Earlington, Madisonville, Princeton, Greenville, Jamestown, and Russell Springs.

Henryville News

By Aurelia Hamilton

Mr. and Mrs. Salvestor Cunningham and sister, Miss Ollie Lee Jones, and Charles Cunningham and wife, all of Dayton, Ohio, spent the day here Saturday

Mrs. Corine Clark and children of Cincinnati, were here Sunday visiting relatives and friends.

Mrs. Mary Williams has returned from Middletown, Ohio, where she has been visiting her son, Albert Williams and family.

Miss Louville Williams, Mrs. Anna L. McGuffey and Dennis Williams were in Louisville, Sunday to see their sister, Mrs. Mattie P. Amos, who is ill.

Miss Catherine Marks of Chicago, Miss Gertrude Marks of Detroit, Mr. and Mrs. Robert Young of Cincinnati are visiting their sister and aunt, Miss Charity Marks. They will also attend the State Convention at Danville, Ky., this week from Tuesday until Sunday.

Mr. and Mrs. George Amos of Lexington, visited his mother, Mrs. Lyde Baker here on Saturday.

Protect wood, concrete, stone or linoleum floors with this quick-drying high gloss enamel. Resists snow, ice and direct sunlight.

Home Hardware

Ellisville Homemakers

By Mrs. Harold McClanahan

The Ellisville Homemakers had perfect attendance, 20 members and 21 visitors at the Blue Lick State Park, July 3.

There were a few wooden trays to be finished but mostly the day was spent in good fellowship with one another.

The following were thosen to serve for the next two years and will assume their duties in September: Mrs. June Hildreth, president; Mrs. Rex Jones, vice president; Mrs. Fred Jones, secretreas. Mrs. Jack Trincher, citizenship; Mrs. J. A. Staniford, publicity; Mrs. William Dollins, reading; Mrs. William Hudnall, landscape; Mrs. Ovel Day and Mrs. Harold McClanahan, recreation.

Mrs. J. A. Staniford visited the U. K. Agriculture Dept. and gave a very interesting report on her tour of the Experiment farm. Dean Welch told of 300 separate research projects in 150 departments. And although this sounds quite conclusive, U. K. trades ideas in research with the University of Indiana. These tours were made atop a wagon equipped with baled hay seats, a small ladder was furnished to assist the ladies in mounting. At noon barbecued chicken with appropriate extras was served. After noon was spent touring the beautiful 1100 acre Coldstream farm recently purchased by the University of Kentucky. This beautiful farm will be developed for the furtherance of cattle, sheep and swine projects. Will also include a pathology department.

The hostess benefit committee asks Nicholas County Homemakers to help fry chickens for the big dinner July 19, volunteer.

The Nicholas County Homemakers annual meeting will be held July 23 at 2 p.m. at the Baptist Church. The program will include "slides" of foreign customs, homes and dress.

Last month's meeting was not reported when we met with Mrs. William Hudnall, June 5 and then began the making of the wooden trays. This craft work was given by Mrs. Ovel Day and Mrs. Rex Jones.

We should appreciate our project leaders for they receive their training from the leader, requiring about four hours of instruction. They must learn the craft so well that they in turn can bring the lesson to their own club and complete the lesson in about two hours time. This is often difficult to do!

August 7, we meet at the Blue Lick Park—no business—no reports—no lesson—But a family night picnic!

Horn, budworms attacking tobacco

Hornworms and budworms are attacking tobacco now, says Richard Thurston, Kentucky Experiment Station entomologist, and should be controlled by sprays or dusts.

Both pests feed on tobacco foliage, he says, but the budworm usually feeds on the growing tobacco bud and undeveloped tobacco leaves rather than on the open leaves.

HORNWORMS: Control with TDE at the rate of one pound of actual material per acre (two quarts of the two-pound per gallon concentrate) or with Endrin at the rate of 0.3 pound per acre (one pint of the 1.6 pound per gallon concentrate). Spray foliage lightly, using five or more gallons of spray per acre when the plants are small. A 10 percent TDE dust or 1.5 percent Endrin dust can be used if dusting is preferred. Apply approximately 10 to 15 pounds of dust will treat an acre of small plants.

BUDWORMS: Either TDE or Endrin can be used at the same rates as for control of hornworms. A 10 percent DDT dust at the rate of 10 to 15 pounds of dust per acre, or one pound of actual DDT per acre (two quarts of the two-pound per gallon concentrate) as a spray is also effective.

Do not spray when the temperature is higher than 90 degrees F. because of the danger of burning the tobacco leaves. do not concentrate the spray or dust in the bud but treat the plant lightly. Thruston says.

THAT'S A FACT

PUSHING AIR

TO UNDERSTAND THE PRINCIPLE OF INVERTED WING FLIGHT, HOLD YOUR HAND ON A SLED FROM A MOVING CAR. TILT YOUR HAND SO THAT AIR PUSHES AGAINST THE UNDER SURFACE—THE WIND RAISES THE HAND. THE SAME FORCE THAT PUSHES AIR SUPPORTS THE AIRPLANE!

LITTLE IN COMMON

THE DELICATE DANDELION DERIVES ITS NAME FROM THE FRENCH WORD DENT DE LION, MEANING LION'S TOOTH. THE WORD DANDELION IS FROM THE FRENCH DENT DE LION OR LION'S TOOTH.

A STEADY AND REGULAR HABIT OF BUYING U.S. SAVINGS BONDS CAN ONLY BE ACQUIRED BY REGULAR SAVING. IT'S A HABIT THAT'S EASY AND PLEASANT IN THE YEARS TO COME. BE SURE!—BUY U.S. SAVINGS BONDS NOW!

Burley plant spray injury

Avoid injuring tobacco with insecticide applications, says Richard Thurston, Kentucky Experiment Station entomologist. Numerous samples of tobacco plants are received annually which show spray damage.

Do not concentrate the spray in the bud; it is much more sensitive than the older leaves and is easily burned by heavy applications of insecticide. Spray nozzles should be passed rapidly over the plant at a distance of 15 to 18 inches from the foliage.

Do not use improper or worn out nozzles. Use the spray nozzle for the particular type of insecticide; for instance, the emulsion concentrates call for a certain type. Do not use wettable-powder type nozzles for emulsion concentrates.

Do not treat plants when temperature is more than 90 degrees F. Spraying during high temperatures can cause plant injury. Spray during late afternoon or in the evening if sprays are necessary in hot weather.

Do not spray tobacco with equipment that has been used for 2, 4-D. Tobacco is very sensitive to 2, 4-D. The designation "equipment" also includes measuring cups, funnels, etc.

Hawaii direct when new phone line is completed

Long distance telephone operators serving Carlisle and other points in the U. S. will be able to place calls direct to Honolulu when an undersea cable to Hawaii is put in service late this year.

The cable ship H.M.T.S. Monowai is scheduled to leave San Pedro, California, on Friday (July 12) to begin laying a 2,400 mile underwater link between telephones in the United States and Hawaii.

"The cable will mean faster and better service an transpacific calls," Clyde Watts, Manager of Southern Bell Telephone Company in Carlisle, said today. "Telephone operators will be able to ring telephones in Hawaii in the same fashion they now place most long distance calls direct across the United States."

At the present, calls from the bud; it is much more sensitive than the older leaves and is easily burned by heavy applications of insecticide. Spray nozzles should be passed rapidly over the plant at a distance of 15 to 18 inches from the foliage.

Do not use improper or worn out nozzles. Use the spray nozzle for the particular type of insecticide; for instance, the emulsion concentrates call for a certain type. Do not use wettable-powder type nozzles for emulsion concentrates.

Do not treat plants when temperature is more than 90 degrees F. Spraying during high temperatures can cause plant injury. Spray during late afternoon or in the evening if sprays are necessary in hot weather.

Do not spray tobacco with equipment that has been used for 2, 4-D. Tobacco is very sensitive to 2, 4-D. The designation "equipment" also includes measuring cups, funnels, etc.

Burley plant spray injury

Avoid injuring tobacco with insecticide applications, says Richard Thurston, Kentucky Experiment Station entomologist. Numerous samples of tobacco plants are received annually which show spray damage.

Do not concentrate the spray in the bud; it is much more sensitive than the older leaves and is easily burned by heavy applications of insecticide. Spray nozzles should be passed rapid-

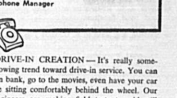
Telephone Talk

by CLYDE WATTS Your Telephone Manager



NEWEST DRIVE-IN CREATION — It's really something, this grown toward drive-in service. You can shop, you can bank, go to the movies, even have your car washed while sitting comfortably behind the wheel. Our telephone engineers are making field tests to add still another convenience to this motorized age — the drive-in telephone, that will let you make calls without leaving your car. We've selected two cities as test sites. If folks like drive-in phones, you'll probably see 'em one day wherever you go on streets and highways. It's still another way we're working to put telephone service in arm's reach of everybody, everywhere.

MISS SOMEONE OUT-OF-TOWN? Why not enjoy the warm satisfaction of a "voice visit" by Long Distance? It's fun, it's easy, and it costs so little especially when you call station-to-station. Just give the operator the name of the city and the number you want. If you don't know the number, give her the name the phone is listed under and tell her you'll talk with anyone who answers. You save up to ½, you know, on station-to-station calls. And you get *extra* values night after 6 and all day Sundays. Then you can talk station-to-station between Kentucky cities for four minutes at the same daytime rate. For instance, you can call Maysville for just 35¢, Frankfort for 45¢. Isn't there someone you'd like to call tonight?
