Musketeers lose to Paris, 43-52

by Sterling (Butch) Saunders

The Carlisle Musketeers lost their second game of the season to the Paris Greyhounds last Tuesday night. It was a hard fought contest, but the superior height of the Greyhounds made the difference. The Musketeers showed a great improvement over their previous outing. After they got a few more days of practice under their belts they will probably have a pretty fair season.

The Greyhounds took the opening tip to start the game off. Both teams used a zone type defense throughout the game. The hounds jumped to an early lead and managed to keep a very few points ahead during the contest. A deadly accuracy at the foul lane kept the Muskies in the game at several different times. Carlisle played some hard headcap ball which forced the Greyhounds to fast protect their lead. The score at the end of the quarters was: Carlisle 4, 22, 31, 43; Paris 11, 27, 37, 52.

"Chuck" Vice lead the Muskies in the scoring column by tallieg 15 big markers. Leroy Hawkins ran a close second by racking up 12 points. The rest of the scoring went as follows: McGuffy 8, Straw 5, Wilson 2, and Smart and Kennett failed to tally. The starting lineup for the Muskies was: Hawkins at center, Vice and Straw at forward, and Smart and McGuffy at the guard posts.

Wilson hit for 18 points to lead the Greyhounds in the scoring column. Conyers ran a close second by racking up 14 points while Jefferson was a close third with 13. The rest of the scoring was: Morris 2 and Elvere, Pipes, Waugh, Cranmer, Owens all failing to tally. Paris' starting line up was: Elvere, Conyers, Wilson, Pipes, and Jefferson.

$555.08 collected in BSA drive

Charles Cox, Chairman of the Boy Scout Fund Drive and Ralph Shearer, Chairman of the Special Gifts Committee stated to The Mercury that a total sum of $555.08 had been contributed by the citizens of Carlisle in the annual Fund raising campaign for Boy Scouts of America and in support of the work of the Blue Grass Council.

Cox and Shearer had nothing but the highest of praise for every person who worked on the solicitation program which was conducted on a one-day campaign basis. After meeting at Williams Restaurant last Thursday morning, November 14, at which time coffee and doughnuts were served to the Teamworkers, everyone connected therewith left and visited the section of the town which had been assigned to them and by the close of the day 95% of the work had been completed.

Security rules change this year

Social security rules this year are different for hired farm workers, according to Earl Mayhew, Kentucky Extension Service specialist Frankfort.

There are two factors to be considered in determining if the hired worker should be reported under social security provisions.

Workers who meet these conditions must be reported.

If they receive cash wages of $150 or more during the work year, or if a worker is employed 20 days or more during the year for cash pay.

Work on a piece rate basis does not count as days in using the day factor, Mayhew said. But the $150 cash earnings still apply.

Reports must be made to the Internal Revenue Service each January and payment of contributions from employers and employees is made at that time. When the worker is qualified, each party pays 2¼ per cent of the cash wages involved.

OFFICE CLOSED

Mail subscribers to The Carlisle Mercury will receive their Mercury a day later than usual due to the Thanksgiving Holiday, Nov. 28. The office will be closed all day.

Man on threshold of space, but where does it begin?

Science's success in sending manned balloons, rockets, and now an artificial moon into the earth's upper atmosphere raises an age-old question: What and where is space?

The phrase "outer space" is commonly and erroneously used in connection with the edge of the earth's protective blanket of air, the National Geographic Society says. In proper usage, outer space means the incredibly distant reaches among stars and galaxies.

Geographically, space is divided into three regions: interplanetary, the local space in our own solar system; interstellar, that among stars; and intergalactic, the countless trillions of miles among galaxies such as the earth's own Milky Way.

Thickness of the Atmosphere

Properly speaking, space begins at the top of the earth's atmosphere. The thickness of the gradually thinning blanket of air is not known. It may be several thousand miles—or far less.

As yet, man his climbed only some 20 miles from the ground. Rockets have belched to 250 miles. The Russian satellite shot into its orbit at a reported height of 560 miles. The mysterious ocean of true space
