High or low, topographic map of County proves interesting

Do you live in the Nicholas territory in 1000 ft above sea level? The highest point in the county is at 2000 ft. The lowest point is at 500 ft. The difference is 1500 ft. The map was made by the U. S. Geological Survey, and is the most accurate map of the county ever published. It shows the topographic features of the county, and is of great interest to all who live in the county.

The map shows the county divided into 36 townships, and each township is divided into 36 sections. The map also shows the location of all the streams in the county, and the location of all the roads. The map is a valuable reference for all who live in the county.
