CHRISTIAN SCIENCE

The spiritual basis of true health and holiness will be emphasized at Christian Science services this Sunday.

The Lesson-Sermon entitled "God" will consist of readings from the King James Version of the Bible and correlative selections from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, the Discoverer and Founder of Christian Science.

Scriptural selections will include the following from Psalms (48:1): "Great is the Lord, and greatly to be praised in the city of our God, in the mountain of his holiness."

The following will be read from Science and Health (518: 19): "Love giveth to the least spiritual idea might, immortality, and goodness, which shine through all as the blossom shines through the bud. All the varied expressions of God reflect health, holiness, immortality—infinite Life, Truth, and Love."

on the market as their owners lose their present high-salaried positions.

36. Construction activity in many communities will decline. Older houses will come on the market.

37. In many sections of the country there will be a greater demand for co-operative modern apartments than for single houses, although old apartment houses will sell for less. More young people and old people will insist upon every modern convenience and upon locations not absolutely dependent on automobiles.

38. Well-located woodlands will continue to increase in price. This certainly applies to pine woodlots, especially in the South.

39. Canadian oil reserves should begin to recover in price unless there is rationing of gasoline in the United States in late 1958.

40. The most important factor in connection with real estate is the parking problem, which is a curse of almost every city. Suburban real estate and farms owe much to the automobile, but the automobile industry is now reaching a stage where it could revolutionize present real estate prices. We owe the automobile industry a debt of gratitude for our present prosperity. It is a bellwether of general business for 1958. It is, however, like everything else, subject to the business cycle and may be a cause of the next depression. Another probable cause will be the failure of one of the big corporations whose stock is among the "30 Blue Chips" of the Dow-Jones Industrials.

STOCK MARKET OUTLOOK

41. The "bloom is off the stock market." We will have rallies and reactions during 1958, but the broad trend will be downward. This is the first time for many years that I have said this in my annual report. There is too much talk about missiles, bombs, and fallout.

42. While the stock market has been going up during the past few years, the bond market has been going down. The reverse will take place during 1958. While the stock market is going down, the bond market will begin to creep upward. This especially applies to tax-free bonds, the purchase of which I strongly recommend.

43. Good cumulative non-callable preferred stocks will also be in demand during 1958. Owing to the money market, they recently suffered in price; but owing to lack of supply, they will be the first stocks to recover. Remember, I am now recommending only high-grade cumulative non-callable preferreds.

44. The large fortunes made in the stock market have come from buying non-dividend-paying stocks at $5.00 a share or under. These will be the first to reach a buying level. If you are to buy these low-priced stocks, you should seek companies without too much cumulative preferred stock outstanding. This is the opposite of the "preferred" recommendation in paragraph 43.

45. Large bank balances will continue to be a good investment in 1958. Many savings banks are now paying 3% to 3½% interest. These balances, however, should not be looked upon as permanent investments, but rather as a means of enabling you to have cash available when common stocks reach a low level. This time may NOT come in 1958. Here again, much depends upon President Eisenhower's condition.

46. Although many corporations interested in atomic energy, electronics, rare metals, and other growth industries will become more prosperous and profitable to investors, some of these new companies will be wiped out. Hence, investors should be very careful in connection therewith.

47. Utility stocks should hold their own with regard to dividends and marketability. Electric power will always be in demand.

48. Most railroad stocks should be avoided. Most passenger business is now being operated at a loss. Trucks, busses, airplanes, and private automobiles will ultimately force the government to take over the railroads. In the meantime, the securities of the long-haul railroads, which specialize in heavy freight, will be the best to own. The short-haul roads should be avoided by investors.

49. Notwithstanding the above, we cannot now become panicky or too bearish. Our country is now operating on the Gold Standard which was responsible for many of our national crises, but is now on a political Standard. Although Newton's Law of Action and Reaction must continue to operate, yet Congress can for a while lengthen the prosperity cycles. This it will attempt to do even if it requires an economic dictator to temporarily regulate money, wages, prices, rents, taxes, and industry in general. It cannot forecast disarmament in 1958. It appears to me now, however, that the present race in guided missiles, atomic underwater navies, surprise satellites and other tremendously destructive military equipment could ultimately rob us of our freedom and turn us back to slavery unless disarmament becomes a serious goal. The Russniks should hasten either another military world war or the elimination of world wars. Russniks should shorten the cold war now in progress.

50. Speaking realistically, the hope of the United States and the world depends upon our spiritual relationships. Only as we grow spiritually, along with our material growth and military power, can the world be kept in balance. Therefore, my final appeal is for the support of all churches of all denominations and their ministers, priests, and rabbis who are carrying the torch of righteousness.
