Munfordville, named for Richard I. Munford, member of the House of Representatives in 1820, 1822, and 1827, is high on the northern bank of Green River. It is the seat of Hart County, named for Capt. Nathaniel G. T. Hart, a Revolutionary War officer.

The average family (3.3) persons, spent about 9 percent of its 1955 food budget on poultry and eggs, slightly more for poultry than for eggs, says the U. S. Department of Agriculture. Each week the housewife spent $1.23 on poultry or 15 percent of the total meat, fish, and poultry cost of $7.99.

Telephone Talk

by CHARLES A. HARRIS, Your Telephone Manager

THE GREAT GREEN FLEET is just that! Over 85,000 cars and trucks are used by the Bell System—the largest private automotive fleet in the world. Of this total, over 10,000 of these vehicles are in use in Southern Bell's nine-state area. They're a familiar sight as they roll through the highways and byways of our land, and in times of emergency or disaster they're often first on the scene. Bearing the Southern Bell emblem, this great fleet is a symbol of progress and good telephone service to all of us wherever we live.

SAFE DRIVING is a habit. With school days underway, it's a good time for all of us to get the habit of driving carefully, especially near school zones and playgrounds. Each year traffic deaths of children alone add up to a terrible toll—a fact that should remind each of us to drive with extreme care. Drivers of telephone cars and trucks can be counted on to set a good example . . . safe driving is part of every telephone employee's training. Southern Bell is proud of the record of its drivers who have helped earn for the Bell System the nation's top safety award for the sixth time in seven years . . . the Award of Honor by the National Safety Council.

THERE GOES DAD! Racing from the shower to answer the phone! Now wouldn't it be wonderful to have a convenient extension phone right there in the bathroom? This Was THE FAITH OF OUR FATHERS

Choosing the right religion is a difficult and confusing problem.

And millions of people, while professing belief in God, choose no church at all.

This "neutral" attitude is not, however, a good answer to the question for any person who wants to be honest with himself. We are among these uncertain ones, it is not a good solution for you when you stop to consider that the eternal destiny of your soul depend upon your choice. And for anyone raising a family, the decision is a matter of grave concern.

If you should decide to seek the one and only true one, and ask yourself this one question: "Why am I not a Catholic?"

First of all, the answer to this question will reveal, almost certainly, that your ancestors were Catholics—that your forefathers worshiped in the historic Church just as your Catholic friends and neighbors all around you are still worshiping today.

It may be difficult for you to trace your "family tree" back far enough to discover when or why your forebears ceased to follow the historic Faith. It may have been in eras of oppression, when imprisonment, confiscation of property and even death were among the penalties for holding true to the Faith. Possibly it happened during the sixteenth-century revolt against the Church. Or it might have been due to a marriage outside the Church, to a lack of religious interest, or even to some disagreement which you would instantly recognize as trivial.

Perhaps your answer to all this will be that you don't care what your ancestors were . . . that you can choose your own religion, or do without one. But will your answer stand the test of your own conscience some day? We know that Christ did establish a Church to which He meant us all to be members . . . including you. We know that He commanded us to "hear the Church." We know that for those to used His Church would endure to the end of time. And we know that the Catholic Church is that same Church existing through the centuries since the days of the Apostles.

A highly interesting pamphlet which will help you to see the impressive need for religion in your personal and family life . . . and help you to decide whether to reject or follow the Catholic Faith —The Faith of our Fathers—will be sent you free in a plain wrapper. Just call on us, write, or drop in today for Pamphlet No. KC-33.

A SAN ANTONIO mother and A father recently became nightclub hostesses for a strange reason: they like to keep an eye on their teenage children . . . It all started when Mr. and Mrs. W. A. Perry, who encouraged their children to bring friends to the house, discovered that their home just wasn't large enough to hold a perfect evening if only two couples were present . . . As a solution for the problem, they opened a teen canteen in an empty store building.

Here the kids dance up a storm to the juke box with the local deejays making occasional appearances for record hops . . . The atmosphere is that of a nightclub, with both the lights and the drinks soft . . . The canteen is open four nights per week, 6:00 to 9:00 o'clock on school nights and 8:00 to midnight on Friday and Saturday . . . The Perrys act as chaperones at all time . . . Nice if you can do it.

need an application of a herbicide this fall to control winter annual weed pests as chick weed and henbit, says James Herron, Kentucky Agricultural Extension Service horticulturist.

He recommends the material Crag-Sesone, applied at the rate of three pounds of wet table powder in 30 to 40 gallons of water per acre.

Treatment should be made from mid-October on, as henbit and chickweed start germinating about then; hitting them in the fall with this herbicide will reduce their growth considerably next spring.

Herron said the areas to be treated should be weeded thoroughly before treatment. The herbicide is most effective on germinating seed of henbit and chickweed or only very small seedlings; larger weed plants, unless cleaned from the patches, will shield the seed; the material also is not effective on larger plants.

Extension Leaflet 164 details the treatment methods, Herron said.

The latest food survey by the U. S. Department of Agriculture shows that the average American eats an egg almost every day, and a little more than a half pound of poultry each week.

The popularity of poultry and eggs is nationwide, and is not greatly affected by income. City people eat more poultry than farm people, but the latter use more eggs, many of which they produced.
