Magics Here Again...

That Old Black

There's a special magic about October... a magic that touches the leaves with vibrant tints... gives the days a crisp, cool zest... makes the world seem more ALIVE. But October gives a reverse kind of magic too... a black magic that stalks across streets and highways at dark of night... showing familiar objects in strange, startling, deceptive shadows across the motorists' and pedestrians' paths... luring them to DEATH.

The thing that makes this black magic so potent is that it catches pedestrians and motorists unaware. Accustomed to the long, light evenings of summer, they're not prepared for the shorter, fall days and the change-over from daylight saving to standard time. So in the early evening hours people proceed at the same speed and with the same amount of caution as they did in the summer months.

Receive ballots for referendum; 38 Nicholas men called for duty
