State education department urges County board to consider further consolidation of County schools

The Schools of Nicholas County were recently reclassified and three schools, East Union, Ellisville, and Parks, were removed from the isolated school list which means that less State Aid will be received for the schools.

Prior to the adoption of the new accrediting standards for Elementary and Secondary Schools for Kentucky, this reclassification of an elementary school would only have resulted in less State Aid when removed from the isolated classification. On June 23, 1959, **The State Board of Education set new standards whereby both the elementary and high schools of a system are accredited.**

For many years the factor of less than 100 enrolled in a high school seriously affected the accredited rating given a high school. Under the new plan, the type of elementary schools and school system maintains and the courses the high school offers will largely determine the rating of the high school. The new plan should result in better schools through the entire 12 grades.

Under the new standards, many school systems, with a large number of small elementary schools, will be faced with the problem of bringing the elementary school program up to requirements.

At the regular meeting on July 14, the Board considered the letter which follows. The letter is self explanatory. The letter at its regular meeting August 1, and has requested further clarification of the letter from the Department of Education.

Copy of letter sent to Chairman of Board of Education and Superintendent of Schools:

"Since i returned to the office after my visit with you a few days ago, I together with other members of the State Department of Education, have been making a study of your educational program with the view of placing ourselves in a position to help you with the improvement of your schools.

As you know, the Foundation Program Law requires the State Board of Education to classify each year all of the schools of your district with fewer than 100 pupils in average daily attendance. The amount of state aid which you will receive for the operation of these schools depends a great deal on the classification assigned to these schools. The regulations of the State Board of Education describes the criteria by which the schools are to be measured.

In this study we have classified three of your schools as nonisolated schools. They are East Union, Ellisville, and Parks, all of which have fewer than 100 pupils in average daily attendance since they are so near other schools which can be made into appropriate centers they cannot be classified as isolated schools.

We note, however, that your Board of Education has consolidated one small school, Myers, during the last year. This is a move in the right direction and we want to commend you and your board highly for having made this consolidation. It will result in better opportunities for your children.

In our study we notice other consolidations which can be made and should be made in the interest of all the children of Nicholas County. We know every member of your Board of Education want to do the things that will mean the greatest advantage to their children. We want to recommend highly, however, that you give serious consideration to the consolidation of your other non-isolated schools, Ellisville, East Union, and Parks.

By establishing two centers, one in Ellisville and the other one at Headquarters, you would be able to provide two centers that would meet the standards for a complete program of education. A full time principal could be employed at both of these centers. I believe that additional facilities at these schools to provide for a complete program could be ar-

Woodie Fryman has no-hitter, wins, 7-1

Hurler Woodie Fryman of Pleasant Springs held the Mt. Olivet squad hitless Sunday in a Kentucky Valley League baseball game on the Mt. Olivet diamond.

His brother, Buddy, was the catcher.

Ronnie Workman went five innings for the Robertson counties and was relieved by his brother Wendell Workman. Vice caught.

Fryman gave only four walks while striking out 18 batters. The Workman brothers struck out 10 batters and gave up three walks.

Catch large Catfish

Innes Ockerman, Chester Ockerman and Paul Donovan were exhibiting a 21 pound river catfish which they caught Wednesday morning on a throw line.

The monster was taken from Licking River below Goose Creek where the three are camping.

LEGION TO MEET

The American Legion Post 17 will hold a regular meeting Friday, August 7 at 8 p.m. at the club. Refreshments will be served. Charles Allison, Vice Commander.

A joint meeting of farm leaders was held on Monday night of this week at the Nicholas County Fish and Game Club, in regard to initiating a complete farm canvass and sign-up for the Area Brucellosis Testing Program. The meeting was sponsored jointly by the Nicholas County Farm Bureau and the Utopia Club of which Sam E. Smith and G. L. Curtsinger are the respective Presidents.

Dr. Robert Singer, State Veterinarian, was present and explained the provisions of the Program under which Nicholas County would cooperate in the Area Testing Program.

The all-farmer canvas is expected to be completed by August 24. The Farm Bureau and the Utopia Club have selected a County-wide Brucellosis Committee, consisting of a Committee Chairman or co-chairman from each of the eight communities. These men are:

Moorefield—Glenn Hardin
Ellisville—John E. Soper, Jr.
—Oval Day
Myers—Noble Gillispie, Stanley Alexander
Barbetville—Howard Sidle
Headquarters — Matthew D. Kennedy
Parks — Harvey Wagoner, Harrold Letton, W. E. Lyman
East Union—Kenneth Stephenson
Carlisle—G. E. Curtsinger

Additional worker are needed to conduct this survey. Anyone who will be willing to assist should contact one of the above Chairman.

The state-wide Brucellosis Testing Program which will eventually affect every county in Kentucky have as their goal, the elemination of Brucellosis in the State. To date, thirteen counties have been completed and are now certified brucellosis free areas.

If Nicholas County is ever to be infestation, probably not more than 2% of the cattle will be infected. However, this 3% is a constant threat as a health hazard to humans and as an encumbrance to loss to livestock producers of both beef and dairy cattle.

A meeting of Committee Chairman has been scheduled for Friday night, August 7 at 7:30 p.m. fast time in the Post Office Basement. G. E. Curtsinger, Chairman of the County Brucellosis Committee, urges all Community Chairman to attend this important meeting at which time community maps will be prepared which will facilitate community leaders in making their canvass.
