The PRICE of Seed is Geared to the "GP FACTOR"

**GP FACTOR**

**PRICE**

Southern States gives you MORE pure live seed for LESS MONEY

Only money paid for Pure Live Seed is money well spent. The price you pay for seed of low Germination and Purity may be MONEY DOWN THE DRAIN—because the PRICE of seed is geared to Germination and Purity (the "GP Factor"). It simply doesn't make sense to try to "save money" and end up getting seeds that will not do the job in your fields. That's being "price wise and crop foolish."

**Southern States Seeds Are a Sound Investment**

Southern States seeds are high in Germination and Purity. Their price as geared to the "GP Factor" is low. They are a sound investment because they give you better stands, less weeds, maximum yields.
