COMMENT

Kay T. Fisher

The figures are in now. There are 36,000,000 young voters in school this year.

That penny-a-gallon boost in the feredal gasoline tax will bring an added revenue of nearly $1,000,000,000

The National debt as of now is $290,000,000,000

There are some 600,000 individuals in the United States who have licenses or student licenses to pilot planes.

The top three automobile manufacturers expect to sell a million cars in 1960.

All this may just be rumor, which is usually a type of factual fiction.
