Early filing of wool applications is urged

Chairman H. S. Vice of the County Agricultural Stabilization and Conservation Committee today urged wool growers who sold wool or lambs during the 1960 marketing year which ended March 31 to file their applications for payment under the national wool program as early in April as possible.

Early filing is highly desirable Mr Vice said, because the information on applications is needed for use in computing the average price received by growers This must be done before the payment rates for shorn wool and unshorn lambs can be determined. Since April 30 falls on Saturday this year, the final date for filing applications is May 2, 1960.

The applications being filed at this time are to show all sales of wool and unshorn lambs during the period between April 1, 1959, and March 31, 1960. For a sale to be considered completed during that period, title must have passed to the buyer, the wool must have been delivered, and the last of the factors needed to determine the net sales proceeds must be available.

Mr. Vice urges growers to be particularly careful in reporting purchases of unshorn lambs on their applications. Inaccuracy on this point is the most troublesome problem in administering the wool payment program, he said.

Under the wool program, payments are made to growers as an incentive to increase wool production The payment rate is the percentage necessary to bring the national average price received by growers up to the incentive level of 62 cents a pound Under the percentage system, the grower who receives the highest price for his wool also receives the largest payment.
