**COOPERATION** is a Kentucky tradition!

WELCOMING NEW NEIGHBORS... OR LIGHTING NEW HOMES!

Kentuckians have traditionally given a warm welcome to new neighbors with gifts, friendly visits and offers to lend a hand. Helping a new friend to unpack or find out about the school has always been the kind of everyday cooperation found in both towns and rural communities.

**Control Of Males In Tobacco Beds And Lawns**

Several people have inquired about how to control males. Many people find using traps for males rather tedious, but fairly effective. A very simple method of controlling males is to use Baiter Law in the rows. Several spot treatments in rowways should be made. First take a stick, such as a tobacco stick and lay the bait on that the bottom of the runway is exposed. Post Baiter Law directly from the can and it has been reported to us that males have been completely eradicated from the lawns. The Baiter Law is available from the Davison Company by using this method. A few in Nicholas County have tried it with success.
