Taxpayers' nightmare

A million dollars is a lot of money, but our national debt is a fantastic \$205 billion. The Citizens Public Expenditure Survey, published last week, shows that the national debt will reach \$200 billion by the end of the year. It would still take about 200 years to pay off the debt.

In the meantime, just what interest on the debt makes it so second, most costly on your federal tax bill. Only the national debt makes it so. We must continue to add our legislators—on the local and state as well as the federal level—to keep operating spending within revenues and stop up the deficit to reduce the debt.

Lack of home rule halting city progress

By James Hodson

Ky. Dept. of Public Relations

Lack of home rule in Kentucky cities is an obstacle to the state's industrial expansion. Current Kentucky constitutions, which do not give cities freedom in making city regulations, are a major handicap to the state's progress. The state's industrial growth is being retarded by the same rules as the city's.

There are two areas in different geographical sections of the state where the industry is being retarded by the same rules as the city's. In one area, the industry is being retarded by the same rules as the city's. In another area, the industry is being retarded by the same rules as the city's.

Party for Five-year-olds

Little Miss Nancy Watkins, daughter of Mr. and Mrs. W. M. Morris, was the guest of honor at a party for five-year-olds given at the home of Mr. and Mrs. W. M. Morris on the farm in the 1800 tobacco crop. The party was given on Saturday afternoon and was attended by many of the children of the neighborhood. The party was a great success and all enjoyed it very much.

Best Time To Cut Corn For Silage

What we want in silage is a crop that will produce the greatest amount of dry matter per acre. There have been many experiments made in this regard and it has been found that the best time to cut corn for silage is when the grain is in the milk stage and the leaves are still green. This is usually about 75 to 80 percent of the crop has been harvested.
