Governor says sales tax helps County's needy

Gov. Bert Combs announced this week that increases in public assistance payments will more than cover the sales tax paid by these needy people. He said the increased payments, resulting from the sales' tax will amount to $7.7 million, when matched by federal funds, and that if the needy receiving the payments spend it all on taxable items (which is doubtful) they will pay only $2 million.

Combs said statewide payments to public assistance recipients totaled more than $5 million last month, representing an increase of $612,229 over the November, 1959 payments when the sales tax benefits were not in effect.

Monthly checks are given to the needy aged, dependent children, needy blind, and the permanently and totally disabled. In Nicholas County, the aged received an average payment of $51.05; dependent children received an average payment of $83.11 per family; the needy blind received an average payment of $54.00; and the permanently and totally disabled received an average payment of $49.73.

These payments represent a total sum of $14,685 coming into the county through the public assistance funds.
