Library submits report for year

The Board of the Nicholas County Memorial Library has just finished making its report to the State Library office. We think you would be interested to know that we have added 483 new books to the library and the book collection is now 13,737 books have been read by people in the county This is a little over two books this year for every person in the county. The Bookmobile makes over 17 stops at the schools and in the communities of the county. The Memorial Library is open now an extra day each week, Tuesdays, Thursdays and Saturdays from one 'til four

All this was done on an income of a little over a thousand dollars We had some funds that we had been saving each year to replace the Bookmobile in the future but now that the State is going to replace the Bookmobiles as they wear out every four years we felt we could use that money to increase the Library service for the county We ended up this fiscal year with a balance of $1,238.38 in the treasury.

We hope that the citizens of our community will help us to increase our income for library services so that we will be able to continue this increased usefulness to all the people here. Speak to your city councilman, your representative on the fiscal court, your representative in Frankfort and your Senator, about funds for the library.

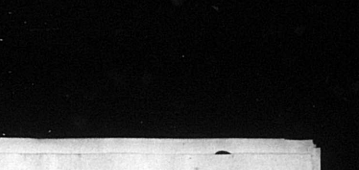
Mobile X-ray unit coming here July 21



AMERICAN LEGION ATHLETICS WINNING TEAM—First row: David Greer, Bruce Barnes, bat boy, Mike Straw, Billy Hamilton, Ralph Frost, Gary Broderick, Ralph Brookshire. Second row: Danny Straw, Larry McKee, Paul Ecton, Marion Sims Jr., John Cleaver, John Hamilton, Terry Barnes. Manager, Paul House. Absent when picture was taken: Jerry Hammonds, Floyd Gilvin.

The X-ray trailer, donated for use in Nicholas and surrounding counties by the Benevolent and Protective Order of Elks, will be in Nicholas county Thursday, July 21 and Friday, July 22. Everyone 20 years old and over is urged by the Nicholas County Health Department to visit the trailer. Persons who have had close contact with TB cases and have positive tests are especially urged to have an X-ray made.

According to Jack T. Morford, M.D., Chairman of the County Board of Health, a positive skin test does not mean that the individual has tuberculosis. It does indicate, however, that someone in his family or close acquaintance may have active tuberculosis to which he has been exposed.

No person under 20 years of age is to come for an x-ray unless he has had a positive skin test, Dr. F. Reynolds, Health Officer, said this week. Exceptions will be made only at a physician's request. Also no one in the first three months of pregnancy can be X-rayed at the mobile unit. Other pregnant women may come if they had a positive skin test reading.

Medical and health department policy is to make X-rays of persons 20 years of age and over and of persons more likely to have been in contact with the disease. Teachers, restaurant workers, food handlers and others in contact with the public are often required by their employers or by law to have proof that tuberculosis is not present.
