Editor The Carlisle Mercury.

We see in the papers, the program, committee of the Blackberry Festival has planned four nights of dancing for the people of Nicholas and adjoining counties. There is nothing unusual about this as the morcos of darkness are always about the Devils business.

Our Fathers and Mothers are asked to read the sixth chapter of the Gospel of Mark and the thirty second chapter of Exodus. Here we find a vivid account of the evils that accompany the dance.

A prayerful study of these scriptures show adultry and murder, idolatry, drunkenness and nakedness all connected with the dance.

Isn't it strange that even in the Old Testiment drinking, nakedness, and adultry went with dancing.

Lest some of our people who profess to love God, be deluded by the Devil into thinking there is nothing wrong with the dance. We would like to call your attention to the words of one of the leading evangelist in America to-day. In describing the dance He used these words. "Child of the Brothel, Sister of Drunkenness, Lewdness, Divorce, and murder, The mother of Lust, A road to Hell.

Please Fathers and Mothers let us give these facts much prayerful thought before encouraging our children to dance.

Yours for a better community

Editor The Carlisle Mercury:

A good many Democratic voters in this county have been questioning why Senator John S. Cooper, the Republican candidate for the office of United States Senator in the November election 1960, has been rated as one of the principal speakers for the annual Blackberry Festival starting today.

It seems to many Democrats that former Governor Keen Johnson should have been extended the pleasure of appearing as one of the principal speakers as a means of giving him equal opportunity to make himself known to the Democratic voters in this county. We know that an invitation was extended to Governor Bert T Combs who could not attend because he was at a Governor's Conference out of the state and which conflicts with the Blackberry Festival.

When it was learned that Governor Combs could not be present a suggestion was made that Keen Johnson be invited as one of the speakers during these festivities. Nicholas County is noted for its loyalty to the Democratic party. We trust that the failure to include Keen Johnson as part of the speaking personell at the Blackberry Festival will cause the Democrats to become even more united in the effort in his behalf and for the election of a Democratic President this fall.

Very truly yours,
The Democratic Committee
of Nicholas County

ACP practice

(Continued from page 1)

self and other members of the committee as being very gratified and greatly pleased at their office completed a tabulation of the results of the Agricultural Conservation Program efforts in 1959 in the county.

As was anticipated, the practice that was most needed in the county was given attention by most of the participating farmers. It is well known that the most effective means of conserving soil and water is to have and maintain a good, thick, vigorous growth of vegetation cover on the land. In 1959 farmers of Nicholas County established or improved 1225 acres of such cover. This establishment included 1115 acres of permanent type grass and legume cover established and 87 acres of temporary rotation of winter or summer cover established. The improvement included 23 acres of permanent hay or pasture improved.

In this establishment and improvement of cover on the land, these farmers used 2234 tons of agricultural lime and 1180 tons were used in treatment of farmland already in grass and legumes.

There will be comparatively little loss of soil or soil fertility from the land that was given this treatment and a high percentage of the rain that falls on it will soak into the soil, aiding that much to the water table level and contributing to on down conservation.

The conservation effort under the ACP was not limited to land cover by any means. Our county farmers also exhibited a great deal of interest and activity in conservation practices aimed directly at the control of the flow of runoff water. They built 43 grassland protection ponds which conserve agricultural water, and in many instances result in a better cover on the land as a result of better pasture management. This better pasture management was further aided by the development of 9 previously ineffective springs and seeps to furnish pastures with a water supply in still other cases some farmers piped water from an already existing supply to their pastures.

In further control of runoff, 80 farmers built and seeded sod waterways to prevent the formation of gullies and cuts in low places in cultivated fields. These areas will retain their fertility longer and go through summer dry weather better than before this treatment.
