Christian Family Hour Service. Wednesday night, 7:30.
Everyone is cordially invited to attend these services.

CHRISTIAN SCIENCE
"Is the Universe, Including Man, Evolved by Atomic Forces?" is the subject of the Lesson-Sermon to be read Sunday at Christian Science churches.
The superiority of divine law over the laws of matter will be emphasized. Included in the Bible readings is the account in John 6:i of how Christ Jesus walked on the sea to join his disciples in their ship.
From "Science and Health with Key to the Scriptures" by Mary Baker Eddy will be read (p. 273): "God never ordained a material law to annul the spiritual law. If there were such a material law, it would oppose the supremacy of Spirit, God and impugn the wisdom of the creator. Jesus walked on the waves, fed the multitude, healed the sick, and raised the dead in direct opposition to material laws."
The Golden Text is from Revelation (11): "We give thee thanks, O Lord God Almighty, which art, and was, and art to come; because thou has taken to thee thy great power, and hast reigned."

In the service

(Continued from page 1)

Jeune, N. C. Serving with the battalion was Marine SSgt. Carl E. McCarty, son of Mr. and Mrs. Clarence McCarty of Myers, Route 1. Using the new vertical envelopment concept, units were lifted behind the "enemy" by helicopters while other infantry troops performed an assault across the beach from conventional craft. This landing climaxed a series of other landings and demonstrations celebrating Fleet Week at the base.

Foods are traveling farther to market these days. In 1959, over twice as many fresh fruits and vegetables were shipped from California to New York City than from New York State into New York City.

FARM BUREAU in Action

By Larry May
Kentucky Farm Bureau Fed.

All of the keys on the keyboard are being hit as the battle for a farm program continues to be waged. But will there be any farm legislation this year? If there is, it may be in the form of a wheat bill patterned on the feed grain program.

The administration's omnibus farm bill will never get to the floor of either house as it is now written, even though most of the controversy over it concerns only the section which tries to give the Secretary discretional powers. There ought to be time to find more votes for the Farm Bureau's cropland adjustment program.

So it can be predicted that the wheat bill may be the only one to go to the floor to be voted on. Hearings are scheduled for it. Roger Fleming, director of the Washington office of the Farm Bureau stated he has answered many questions on the signup for the grain bill.

One of the objectives of the Farm Bureau is to take land out of production. The feed grain program may do that. Fleming said, "but we don't know exactly how much until the facts are in."

Fleming was in Louisville last week to speak to the Farm Bureau information conference. So was Charles Shuman, president of the American Farm Bureau Federation.

Shuman, while here, further clarified his stand on the tobacco program. "I would suppose that the tobacco farmers would oppose any attempt to change the tobacco program materially."

"The program is working relatively well," he said. "If all crops in the United States were comparable to tobacco, you could have government programs for them."

He predicted that, "the day a cheap synthetic tobacco is developed, will be the beginning of the end for the tobacco program."

Shuman had this to say of the cropland adjustment program. "It has an excellent chance if it ever gets out of committee. I would hope that the president would sign it."
