Wheat average rate announced

The average county rates per acre for wheat acreage diverted to conservation uses under the 1962 wheat program are $21.00 and $28.00, according to H. S. Vice, Chairman, County Agricultural Stabilization and Conservation Committee.

Individual farm rates are based on these county rates, depending on the farm's productivity in relation to the county average, the Chairman said. He also pointed out that each wheat producer in the county with a 1962 wheat allotment, and also each producer without allotments who have grown wheat in at least one of the years 1959, 1960 or 1961, has received information on the 1962 wheat program, including two rates for his farm.

For the minimum payment, the rate is 45 percent of the adjusted basic county support rate, multiplied first by the number of diverted acres, and then by the individual farm yield or productivity index.

The maximum payment rate is computed in the same way using 60 percent of the adjusted basic county support rate.

Producers must use an acreage at least equal to 11.1 percent of their 1962 farm allotment for conservation in order to be eligible for price support under the 1962 program and be in compliance with their 1962 allotment.

In addition, farmers may voluntarily divert an additional one-third of their 1962 allotment. The payment earned for this additional diversion is made at the maximum farm payment rate.

The diverted acreage must represent an additional amount over the normal conservation acreage and any acreage diverted to conservation uses for which payment is made under any other Federal program, such as the feed grain program. However, cost-sharing under the Agricultural Conservation Program (ACP) or the Great Plains Conservation Program (GPCP), may be used to carry out conservation practices on diverted acres.

Contributions aid lunch program

The Nicholas County school lunch program wishes to express sincere appreciation and gratitude to the VFW Post No. 8666 of Carlisle and to a youth, Sunday School Class of the Christian Church of Carlisle. The VFW has donated $25.00 to each of the school lunch programs at Moorefield, Nicholas County Grade and Nicholas County high school for free lunches for deserving students at the schools. Mr. Enoch Doyle is president of the local VFW Post.

A youth class at the Christian Church is sponsoring a free lunch for a first grader at Nicholas County Grade School.

During the month of September a total of 831 free lunches were furnished at the following schools: Moorefield, 246; NCGS, 396; and NCHS, 189.

This fall the school lunch program in Nicholas County opened with the same lunch prices as were used in the operation last year. Because the reimbursements were cut last April and May the program had to open with funds very low. It was agreed to operate the first month without a change in price. After the first month's records are thoroughly studied an announcement will be made
