Henryville News

by Harrison Hamilton

Miss Frances White of Louisville, visited here over the weekend with her parents, Mr. and Mrs. Alando White.

Mr. and Mrs. Robert Stevenson and family of Cincinnati, visited here over the holidays with his parents, Mr. and Mrs. Joe Stevenson.

Richard Johnson of Cincinnati, visited here over the week-end.

Mrs. Ada Timberlake of Lexington, visited here during the weekend.

Mrs. Mary Ann Moore is visiting in Michigan with her brother, James Bailey Jones.

Cleveland Albert Johnson of Middletown, Ohio, visited here a few days ago.

George Amos of Lexington, visited here for a few hours Saturday night with relatives and friends.

Millersburg

by Mrs. Martin Heflin

Mr. and Mrs. Cletus Taylor, son and daughter of Indianapolis, Ind. spent Saturday and Sunday with her parents, Mr. and Mrs. Leslie Ritchie. Sunday they all spent the day with Mrs. Beatrice Hurst in Lexington.

Mrs. Carrie Feeback and grandson of Indianapolis spent Friday night and Saturday with her sister, Mrs. Leslie Ritchie and family.

Mrs. Glen Rainey and daughter spent Saturday with her parents, Mr. and Mrs. Martin Heflin.

Mr. and Mrs. William Brown of Cincinnati, and Miss Lena Hazelrigg of Moorefield, visited Mr. and Mrs. Donald Heflin and family Friday evening.

Bobby Dale and Eddie Hill spent two days last week with their cousin, Gary Otis in Lexington.

Mrs. Myrtle Heflin visited her sister, Mrs. Irene Heflin, Sunday of last week.

Miss Lida Butler visited Mrs. Charles Porter, Sunday.

Saltwell

by Mrs. Fred Holler

Mr. and Mrs. Carl Amstuth and daughter of Middletown, Ohio, spent the past week with Mr. and Mrs. Roy E. Snapp.

Mrs. Ida Dray of Washington, D. C. also spent several days recently with Mr. and Mrs. Snapp.

Lonnie Williams of Paducah spent the past week with Mr. and Mrs. Reynolds Gaunce.

Mr. and Mrs. W. C. Hunt are parents of an eight pound daughter born at Harrison Memorial hospital, Cynthiana on August 30. Mrs. Hunt was formerly Miss Brenda Hollar.

Mr. and Mrs. Fred Hollar and son spent Sunday with Mrs. Lee Holtar and son of Headquarters.

Mr. and Mrs. Jesse Alexander of Ky. Village spent one night the past week with Mr. and Mrs. C. C. Allison.

Mrs. Mertie Kenney entered Harrison Memorial hospital in Cynthiana last Monday and remains a patient there.

Mrs. G. C. Gaunce accompanied her husband Rev. G. C. Gaunce to Jackson Chapel Church in Estill County the past Monday to conduct a two-week revival for Rev. Gene Howard. Mrs. Gaunce returned home on Tuesday.

Mrs. Pearlie Morris, Mrs. Gene Kenney and Mrs. Calvert Sosby spent Monday with Mrs. Alec Crawford and daughter of Carlisle.

Mr. and Mrs. Gilvin Curtsinger furnished the truck to take the Headquarters M.Y.F. on a hayride and weiner roast at the Blue Lick State Park on Friday night. There were about 30 who enjoyed the fellowship. Mr. and Mrs. Fred Hollar also went as guests.

Strauder Hollar spent several days the past week at Nicholas County hospital suffering from pneumonia.

Mr. and Mrs. Alec Ward and Mrs. Phyllis Stacey of Lexington spent Saturday and Sunday with Mr. and Mrs. Johnny Ward and daughter.

Mr. and Mrs. Bill McDonald of Cincinnati spent the week-end with Mr. and Mrs. Floyd McDonald and Fred.

Mr. and Mrs. Bobby Kenney spent from Friday until Monday with Mrs. Gladys Kenney.

Mr. and Mrs. Stanley Feeback spent a week recently in Carson, Iowa, guests of Mr. and Mrs. Leslie Cook.

Clark Taylor entered the Convalescent Home in Carlisle during the week and remains a patient there.

Mr. and Mrs. Fred Sowell spent Sunday night with Mr. and Mrs. Fred Hollar and son.

Myers road

by Mrs. T. H. Vice (Delayed)

Mr. and Mrs. Ray Dayton, Cincinnati, were guests of Mr. and Mrs. Paul Cameron last weekend. Mr. Dayton was in Lexington one day to visit his mother.

Mrs. J. Maurice Cameron spent Thursday night with Mr. and Mrs. T. H. Vice and Tommy.

Mr. and Mrs. Marshall Walton attended a surprise birthday dinner for Earl Letcher, Sunday.

Mrs. Ella Bogguss and Mrs. Virgie Wilson, Norwood, Ohio, visited relatives and friends here over the weekend.

Mr. and Mrs. James Cassidy, LaGrange, visited his sister, Mrs. Robert Vice and Mr. Vice over the weekend.

Mr. and Mrs. Clarence McFarland and son ,Ford, Ky., spent Saturday with his parents, Mr. and Mrs. William McFarland.

Mr. and Mrs. Billy Mills, Knoxville, spent the weekend with her parents, Mr. and Mrs. Lloyd Evans and family and accompanied Sandy McCann home.

Mr. and Mrs. Robert Vice visited Mr and Mrs. Stanley Rose and son, Sunday.

Miss Sandy McCann spent two weeks with her grandmother, Mrs. Ben F. Barnett and Mr. Barnett in Dayton, Ohio.

Mr. and Mrs. Gayle Bowen and Tara, Miss Jan Hanley, Lexington, Mr. and Mrs Harvey Hardwick and two children, Mr. and Mrs. Trigg Breese, Morrow ,Ohio; Mrs. Mag Hardwick, Clarksville, Ohio; Mrs. J. Maurice Cameron, Mr. and Mrs. Ben F. Barnett, Gayle McCann and Tommy Hamm, Dayton, Ohio, visited Mr. and Mrs. T. H. Vice and Tommy, Sunday afternoon.

Mr. and Mrs. Jesse T. Ockerman, Nepton, spent Sunday afternoon with Mr. and Mrs. A. C. Bowen and family.

Fall plans for Lexington Trots

Walter Gibbons, General Manager of the Fall Meeting of the Lexington Trots, stated today that the annual races would be held from September 27 thru October 7, with no racing on Sunday and Monday, October 1-2.

The historic track, known as "The Big Red Mile" is considered to be the world's fastest track and has been the scene of the fastest harness race performances on record. The World's record miles at both the trot and pace have been set there with the later being recorded only last year by Adios Butler in 1:54.4.

During the 9 days of racing, pari-mutuel wagering will be in effect and many special events will be held to capture the attention of the crowds. Over $350,000 in purses will be offered with the spotlight centered on the $65,000 Kentucky Futurity being conducted for the 69th year. In that race the championship of the 3 year-old trotters will be settled.

Ladies Day will be observed on Friday, Sept. 29, and Thursday, Oct. 5, at which times all ladies will be admitted free. Valuable prizes including TV sets, a pure white pony, and a trip to Daytona Beach Florida, will be given to some lucky ladies.

To add to "Spectator Fun in 61" the track management plans to have other special days honoring the Lions, Kiwanis, Rotary, and Civitan Clubs, and beauty queens from various county fairs will be in attendance daily to act as official hostesses. High School bands will also perform each day.

Special sports parties will be organized for every county in the Blue Grass offering a combination day of sports starting at noon at the track and ending at a U.K. football game in the evening.

11,000 persons expected to enroll at U of K for the fall semester

More than 11,000 persons are expected to enroll for study this fall at the University of Kentucky, an increase reflecting the steady expansion and improvement of many of its facilities.

UK, which in 1965 will celebrate its hundredth year as a land-grant institution, is in the midst of its greatest period of growth—both academic growth and physical.

On the physical side, UK is a city a-building. The final phase of the University's Medical Center — the 500-bed hospital—is scheduled to be finished in January. This added to the already completed Medical Sciences building, College of Nursing and nearly-completed College of Dentistry will provide Kentucky with the outstanding Medical Center of the South.

Wall under construction is the $6,000,000 chemistry-physics building. This four-story structure will enable departments to move from old, crowded quarters and continue the teaching-research upon which the future of the world is based.

Students returning in September will find construction underway on the addition to the main campus library. This $1,800,000 addition will double the space in UK's "central house of knowledge."

A new women's dormitory and central dining hall will be completed by September, 1962, and plans have been approved for an addition to the Student Union Building. In the planning stages are new buildings for the College of Commerce, College of Engineering, and College of Education.

September will also mark beginning of construction on an Agricultural Science Research Center, a multi-million-dollar complex from which is expected to come many of the scientific discoveries necessary to keep agriculture apace of other technical achievements.

Academic improvements have accompanied the physical improvements. The second classes of nursing and medicine will start in September—both with significant increases in numbers over the initial classes. The first College of Dentistry class will begin classes in September, 1962, and post-graduate classes in all phases of medicine, dentistry and medical technology will increase as facilities become ready.

Other new programs recently begun at UK include those in diplomacy and international commerce, new sequences in chemical engineering and architecture, and the Honors Program for the brilliant student who desires an accelerated program.

Entering UK freshmen are proving themselves academically higher on testing than in previous years and this "quality factor" is being felt up the ladder as students continue to compile better grade-point standings in the face of admitted tougher courses.

A summer orientation program for incoming freshmen and their parents attracted more than 2,200 to the campus during July and August. The program was a start toward what University officials hope will be a prior-registration plan so that students will know months in advance what courses they will be taking and also will have pretransacted registration business.

Enrollment in the UK Graduate School has increased 50 per cent since 1952 to nearly 1,200 during regular terms and some 1,400 during the summer term.

Quality has extended into faculty ranks along with other improvements at UK. Increased salaries are attracting more top-notch personnel and helping retain those nationally recognized in various fields. More than 900 persons hold teaching, research, and administrative assignments at UK.

In addition to its city-like main campus, and in keeping with its purpose of extending education to every person in the state who desires it, the University has two-year, off-campus centers at Henderson, Ashland, Covington, Cumberland, and Fort Knox. The latter will be moved to Elizabethtown when the new building is completed there. The first two years of college work are offered at these centers, permitting the students to transfer to the Lexington campus for the last two years without loss of credit.

All new freshmen (those enrolling in a college for the first time) and all students transferring to UK from another school are required to report for the 1961 fall term on Sept. 11. Others will register for courses from Wednesday through Friday (Sept. 13-15) and classes will begin Monday, Sept. 18.

The Progressive Farmer Lives Better With a LAND BANK LOAN

With a Land Bank Loan you can buy a farm, or add to your present farm; build or improve your home, barns and feed handling facilities, milking parlor, or water system, carry out herd expansion, land improvement and irrigation plans; refinance debts and any other purpose.

With a Land Bank Loan there is no application fee, no appraisal fee, no closing fee.

How to get up to 30 extra miles per tankful

Shell test drivers add a "fifth wheel" to their cars for precise distance measurement during mileage tests. It helps them record performance to a decimal point.

Here are some tips from Shell's experts on how to get maximum mileage from your car. If you practice these good driving habits —and if you use-today's Super Shell, with 9 ingredients for top performance—you may well save a pretty penny on gasoline bills.

SHELL scientists spend much of their working lives figuring out how to get the most mileage out of a gallon of gasoline. Here are some of the things they've learned.

1. Don't race a cold engine. When your engine is cold, it uses up more fuel. You're also in danger of underlubrication. You pay in greater engine wear.

SOUND: *Today's Super Shell has fast warm-up ingredients to save gasoline. And Shell X-100® Premium Motor Oil moves freely even when cold—saves fuel and reduces engine wear.*

2. Use a light touch on the accelerator. Tromping down on the pedal is an expensive habit. Starting up, it holds your automatic transmission in a lower "gear" longer—makes the engine turn faster, wasting fuel. Unchecked, uneven pedal pressure is costly, too. Feed just enough fuel to maintain even speed.

3. Drive "ahead of your car." Watch for slowing traffic and red lights as far ahead as you can see. Then coast up to the stopping cars, instead of braking heavily when you get there.

4. Don't let fuel costs creep up at the stop light. If your car "creeps" when idling with the automatic transmission engaged, have your idle speed adjusted. If you detect a stick shift, remember that pumping the accelerator won't change the light. It only uses up gasoline.

5. Don't indulge in jack rabbit starts. Racing starts are fun on race tracks—but the drivers of those cars are lucky to get 6 miles per gallon.

SOUND: *Air resistance at high car speed is the biggest single drain on power. It increases approximately as the cube of the vehicle speed. Even for idle on aerials may cost you gasoline.*

6. Check your tire pressure regularly. Under-inflated tires increase friction and cut mileage.

SOUND: *Tire pressures build up during a long run. Don't let air out to bring the pressure down—it makes the tires run even hotter. Check cool tires only.*

7. Check for dragging brakes. Have your Shell dealer check for wheel drag next time you're in for a lubrication. If brakes drag, you pay for it every mile.

8. Get them fuel-saving adjustments. If spark timing is off, for example, you pay in wasted gasoline—and possibly in engine damage. A compression check can reveal power-wasting valve and ring conditions. Other essentials:

A. Keep your spark plugs at peak efficiency. Use Super Shell gasoline with unique TCP* additive to give them extra life.

B. Adjust carburetor.

C. Have automatic choke checked.

D. Clean or replace filters for air, fuel, oil as manufacturer recommends.

E. Tighten fuel line connections.

F. Have automatic transmission or clutch checked regularly.

9. Get regular oil changes and lubrication—including transmission and differential. Your Shell dealer knows what to do. And he has the finest equipment and lubricants. Your car will last longer. Your gasoline will go farther.

10. Show this advertisement to everyone who drives your car—especially if you pay their gasoline bills. We can't guarantee 30 extra miles per tankful—but the closer these suggestions are followed the better your mileage will be. To start off right, fill up with today's Super Shell. Its nine ingredients mean *top performance.*

Super Shell's 9 ingredients for top performance

#1 is TCP for power and longer plug life.
#2 is Petrotane for quick, fast warm-ups.
#3 is anti-knock mix to resist all knocks.
#4 is Alkylate to control "high-speed knock."
#5 is Butane for quick starts.
#6 is "cat-cracked" gasoline—for power.
#7 is "anti-icer"—added in cold weather.
#8 is gum preventive for fast carburetors.
#9 is Platformate for extra mileage.

SHELL

At Shell, 1997 scientists are working to make your car go better and better.

*Trademark for Shell's unique gasoline additive. Gasoline containing TCP is covered by U. S. Patent 2889212.

Hunting seasons, limits noted

Frankfort, Ky., Aug.—Kentucky's 60-day goose hunting season will open on November 10 and continue through January 8, while the abbreviated duck season of 30 days will open on December 1 and continue through December 30, Minor Clark, Commissioner of the Department of Fish and Wildlife Resources, announced today.

The bag and possession limit for ducks has been cut to two and four, while for geese the bag possession limit is five with not more than two Canadas or white-fronted or one of each of the latter two species, the commissioner announced.

Due to the poor duck nesting season in the northern areas with a sharply reduced hatch, the U. S. Fish and Wildlife Service has trimmed the number of days for duck hunting throughout the United States as well as reducing the bag and possession limits. The two ducks a day allowed, or the four after two or more days of hunting, may not include more than one wood-duck or one hooded merganser and no readheads or canvas backs may be taken this season.

Along with the announcement of the statewide waterfowl season the commissioner also listed the dates for hunting on the Ballard County grounds. Duck hunting will open at sunrise, December 2 and continue through December 31, while for geese the shooting opens on December 2 but continues through January 8. The same bag and possession limits that apply to the statewide hunt will be enforced on the Ballard area. Only morning hunting will be permitted there and no Sunday hunting will be allowed on these grounds.

Commissioner Clark pointed out that the Ballard County area season actually could open on December 1 but since Federal regulations prevent morning hunting on opening day and since only morning shooting is permitted on the management area, the shooting date was delayed until December 2 to comply with both regulations.

The shooting hours for geese are from sunrise until sunset while for ducks the same hunting hours will be observed except for opening day when the shooting shall be from noon until sunset, the commissioner said.

80 SCIENCE TEACHERS STUDY METHODS AT UK

Many Kentucky high school students will take a new approach to the study of science this fall.

This is because 80 high school science teachers, most of them from Kentucky, have been learning new teaching methods at the National Science Foundation's summer Institute at the University of Kentucky.

Under the new zoology teaching method, called the ecological approach, the students study the effect of weather, food, soil and other factors in nature upon what animals and plants do and how they do it.

Fallout shelters do-it-yourself cost about $200

Fallout shelters used to be a little like the weather. Everyone expressed an opinion, but no one cared to do anything about them.

Now, in light of recent happenings, many families are prepared to take positive steps. In so doing however, it's surprising what little they really know of the subject.

To begin with, a fallout shelter is just what the name implies It is not a blast-proof refuge but rather a facility designed to afford adequate protection against radioactive fallout. This naturally raises the question of what exactly is fallout?

Fallout is tiny pieces of dust and debris which are made radioactive by nuclear explosions. When an H-Bomb explodes close to the ground, thousands of tons of these particles are sucked upward to form the familiar mushroom cloud.

Some of this radioactive matter spills out of the cloud near the blast area. Most of it, however, is carried by the wind and could eventually settle in any
