Christmas tree safety tips

More than 50 million American families are buying Christmas trees and decorating them for the holiday season.

Unless care is taken, this happy symbol of the holiday season can bring tragedy, warns the National Board of Fire Underwriters.

These suggestions are offered by the Board to keep your Christmas tree fire-safe:

1—When you buy a Christmas tree, choose one which appears fresh. Before you buy the tree, run your hand over the needles to make sure they are firmly attached. If needles fall when brushed, the tree is dry and you should select another one.

2—When you get the tree home, keep it outdoors until you are ready to decorate it. You can keep it fresh by standing it in a pail of water.

3—You should wait until just before Christmas before setting up the tree.

4—You should place the tree in the coolest part of the room, away from radiators, heaters and the fireplace. This will keep the tree from drying, and reduce the chance of fire.

5—Your Christmas tree stand should be of the type equipped with a water container in which the trunk can rest. Fresh trees will "drink" a sizeable amount of water, and you should fill the water container daily.

6—Only flameproof decorations should be used on the tree—those made of glass, metal or fire-resistant material.

7—Use only electric lights to illuminate the tree and be sure to check light strings before placing them on the branches. Those with frayed wires should be thrown away. If you buy a new set, select a type that bears the Underwriters' Laboratories label.

8—The switch controlling the tree lights should be some distance from the tree.

9—Electric trains — part of Christmas in many homes—should be set up away from the tree. Sparks from toy trains could be fire hazards.

10—Lights on Christmas trees always should be turned off when everyone is away from home.

11—Check the tree frequently for dryness. In particular, check tree needles near lights. If they have started to turn brittle, Change the position of the lights.

12—When needles become so dry they start falling, take the tree down at once and put it outdoors.

10—When Christmas presents are opened, the gift wrappings you intend to keep should be folded and put away. Other paper, ribbon and boxes should be gathered up and thrown away promptly.

14—Even if the tree still appears to be fresh, take it down the day after New Year's.

Art Contest winners featured in Mercury's Christmas edition

This week, the "Christmas Greetings" edition of The Mercury is featuring the drawings of the Mercury Christmas art contest.

The artwork has been done by students from the City school and County elementary schools, up to and including the fourth grade. There were many entries, all showing talent and imagination regarding the Christmas spirit.

We are grateful to the judges, Mrs. John T. Hamilton, Mrs R. L. Talbert and E. E. Pfanstiel for taking time at this very busy season to judge the drawings, for it was not an easy task.

The reproduction of the artwork was made possible by the change-over from letter press to the offset method of printing. The Mercury having made that change in August, makes it possible to utilize drawings or artwork in many phases of newspaper production.

Winners in the county schools were: Mary L. Burden, 9, daughter of Mr. and Mrs. Maxwell E. Burden, Route 2, grade 4, Nicholas Elementary—1st and $1 prize (total $6.00).
