NICHOLAS SCD REPORT

The importance of conservation Activities

The regular monthly meeting is held on the first Wednesday night of each month. Special call meetings are held as deemed available. Attendance is exemplary. Rarely does a supervisor miss a meeting.

Believing that good equipment is needed in the District to do the best conservation work. this SCD has sponsored the purchase of several pieces of big equipment. None was bought this year. The last to purchase the most recently obtained bulldozer has been repaid except for a few hundred dollars. The equipment trailer was complete-ly overhauled this year. A new bulldozer was bought this year by Fred Jones, his second, owning three. Jones has cards for use in this and adjoining districts, but it was not financed by a loan handled by this district.

The Nicholas County Flood Control Association has contributed $352 to the district for operational expenses.

This is the first contribution made by the Fiscal court since the organization of the district. The contribution was made in response to the district's presentation of its proposed annual budget.

A part-time secretary was employed during the year to assist in the administrative work of the district and the Soil Conservation Service.

Other sources of income include voluntary contributions by heavy equipment operators and rentals from water tank forms.

The district sponsored Soil Stewardship Week and furnished bulletin material to the min-isters for use in developing a soil stewardship sermon. Inserts were also provided. "Honor Awards" for presentation to participating ministers were obtained.

Five regular monthly meetings were held on farms during the summer to enable the board of directors to observe conservation accomplishments of fellow supervisors.

Two Board members, their wives, the Work Unit Conservationist attended the State Convention of the Soil Conservation Districts at Kentucky Dam Village.
