DUNCAN'S ELECTRIC SHOP

What would happen to you if all the Rural Electric Co-ops in Kentucky ceased to operate?

"Nothing," you say. You live in town. Trust Again!
Rural electric, as supplied by the Rural Electric Co-ops has done more than anything else to raise the buying power of the Kentucky farmer. Thanks to low cost rural electricity he can operate his farm more efficiently, can produce more and better crops, can make more money. And this money that makes he spends in the towns and cities of Kentucky. Take away rural electricity and you take away the farmer's power to buy ... and much of the power in your prosperity.

Kentucky's farmers originally built their rural cooperatives for one purpose only ... to get the electric power they could not buy elsewhere! Out of their cooperation has grown a force powerful enough to keep Kentucky's prosperity glowing.

Put it in perspective. The Pentamix is for fat warm-ups. The Pentamix is in Super Shell's warm Blend help you "warm up" process inside your engine.

CAMPBELL HOUSE

LEWISBURG, KY. PHONE 4490

Home hot and bathes even though heater is filled with cold water. It rapidly warms up water so you bathing water is hot again. Enjoyer's ability to warm up bathing water is to keep your hot water tank from freezing.

One of Super Shell's 9 ingredients can boil on ice. Helps your car start fast for top performance on coldest days.

EVEN in zero weather, a car in good mechanical condition should start in 3 or 4 seconds.
If it doesn't, could be that your gasoline isn't vaporizing fast enough. Winter can have that effect on gasoline.
Shell scientists take care of this problem by including an ingredient called **Buamine** in Super Shell's 9 ingredients. This Buamine can hardly wait to vaporize. It'll even boil on ice and turn vapor for use before the engine starts. Fast vaporization, fast starts. It's that simple.

Note in very cold weather, Super Shell gets an extra dose of Buamine. Shell's "anti-ice" cans vital carburetor parts with a very thin chemical film. This film discourages critical ice buildup and cuts your chances of icing walls.
How Super Shell's other ingredients help you get top performance
Now you know about three of the nine ingredients in today's Super Shell. Here's how the others help to give your car top performance.
TCM additive helps restore the power that combustion deposits can take away.
Extra high grade is so smooth, even power with a puff.

ALL the help control high speed knock? Cam pressure helps keep carburetors clean inside.
Anti-knock mix goes extra distance to knock.
Platform is for extra mileage.
F.S. When you drive for a tenth of Super Shell's 9 ingredients can take you to trouble.
