Letters to the Editor

Dear Sir: I have just read your issue of February 26, 1962. I am glad to see that you are still publishing the 'Old Faithful' column. It is a very interesting and helpful column.

FARMERS!!! FARMERS!!! IS THERE REALLY A DIFFERENCE

Before You Trade for A New Tractor This Year, Find Out if There Really is a Difference in 3-POINT HITCH SYSTEMS. DOES THAT "OTHER" TRACTOR OFFER????

- 1. Fully Automatic Hydraulic Control of 3-point Hitch - Lifts Up & Down.
- 2. An Extra 140-12 Control Levers, one (1) to raise & lower the Implement one (1) to set & vary the draft load.
- 3. Controls to vary the amount of Draft load or it is preset at the factory and you cannot set to meet your soil conditions.
- 4. Does that tractor have complete "Live/Hydraulics" - "Live" even when the clutch is all the way down.
- 5. Is the draft control sensitive enough that it will work merely by applying lightly pressure to the upper link.

Yes, There Is A Difference, And You Will Find It in the IH (New For '62) Line of Tractors At **BUNTIN'S GARAGE**. Watch For Our Open House Coming In March. These Are The Tractors That Automatically Plow and Cultivate Over Hills and Terraces.
