Telephone Talk

by CHARLES A. HARRIS
Your Telephone Manager

WHEN THE FIRST TELEPHONE CALL WAS MADE IN 1876, Alexander Graham Bell had the only transmitter in the country. Thomas A. Watson, his assistant, had the only receiver. Today, more than 75,000,000 telephones in the United States carry an average of over 200,000,000 conversations every day. Bell System telephones can be connected to other telephones almost anywhere on earth. Although you can reach 99 per cent of the telephones in the world.

A TELEPHONE OPERATOR answering a call with "Number, please," heard a voice reply, "Dadson." "What number, Dadson?" asked the operator. "No number, just Dadson," replied the voice impatiently. "I'm dadson the telephone."

YOUR VOICE IN PRINT—Scientists are learning that voice may be as distinctive as fingerprints. Several years ago Bell Laboratories scientists discovered a way to "transcribe" voices. Now they are looking for ways to classify voices so that an unidentified voice can be matched against other voices already on file.

THANKSGIVING AND HOLIDAY—We hope you can be with your family on this special day. But if you can't, who will share the joy of the holiday by telephone? The sound of your voice across the miles is the best way to say, "I'm thinking of you. I wish I could be there." If you are one of the lucky ones planning a holiday trip home, call ahead. It's the spoken word that makes happy plans. Whatever you do, wherever you are on Thanksgiving Day, our telephone company wishes you all the good things of this happy season.
