Supervised Play—Mrs. Clarence Ogden's Fifth grade at the Nicholas County elementary school is engaged in a wheelbarrow relay during the supervised play period.

Nicholas County elementary school has made some steps toward improving the physical education program. This is being accomplished by initiating supervised play periods for every room. These periods will be twenty minutes in length and will be held at all times, greater care is given to each, and the primary students in the grades one through three will have organization in their program because children at this age have been made to adjust to a rigorous training schedule and free play will provide a break in the regimented school order.
