Dear Santa,

THE BIG DAY IS ALMOST HERE. Plans are well under way for parties, dinners, presents, surprises of all kinds. And most of them mean lots of work for the lady of the house. May we suggest a very *personal* way to celebrate Christmas. No work . . . not much time required . . . very little cost. Telephone calls to friends and relatives near and far! Send your good wishes over the miles by telephone. The sound of voices we love is the very nicest kind of gift to give or to receive.

MYSTERY. A woman in New Orleans couldn't understand why her friends complained that she often picked up her phone when it rang and then didn't answer. So she kept an eye on the phone. Seems that a cat whose naps were being disturbed had learned to knock the receiver off the hook with his paw, then take up his nap where he'd left off. The problem was solved when the bell chime was installed. Now the cat purrs when the chime chimes. Both lady and cat are enjoying the new sound of their telephone.

*Your friends at Southern Bell hope you and your family have the Merriest Christmas and the Happiest New Year ever!*

*It's almost Christmas.*

*Ask anybody. Ask the housewife, dashing about in the kitchen, cooking up plenty of food and goodies for all the "company" that is expected.*

*Ask the average father. Christmas is practically here and he has done very little (or none at all) of his gift buying. He's been visualizing the total cost of all the other packages that have been brought into the house and wonders if he won't have to find a place to hide some January 1.*

*Ask the children. They are "wound up" tight as an eight-day clock and it seems to them Christmas "will never get here."*

*Ask anybody. They'll tell you Christmas is almost here. Regardless of whether all preparations are made, all cards addressed or mailed, or whatever, just ask anybody . . . and you'll know.*

*Ask anybody. They'll tell you why Christmas is almost here. It's a feeling that comes to virtually everyone at this time of year. It is difficult to describe accurately, but it is a mixture of joy and subtle happiness and friendship.*

*Let's just call it the Christmas spirit—and hope that it is shared by all men, everywhere.*

## HEARTS GO HOME AT CHRISTMAS

*Christmas is that time of the year when most every heart turns homeward.*

*The blinking lights of a Christmas tree in the window or the jingle jangle of Christmas bells is enough to send one's thoughts winging across the years and over the mountains and seas to that "one best Christmas of all" so long, long ago.*

*The sounds and the smells of Christmas are so easily captured . . . freshly-cut evergreen, a basket of fruits and nuts, cookies and pies, turkey roasting in the oven, the pop-pop-popping sound of logs burning low in a hearth fire.*

*How easy today for the crunching sound of boots in the snow to bring the memory of long ago when young hearts trudged across the crusty fields toward the light that beckoned through the church window, a haven of warmth and peaceful reverence in the near-dawn of a Christmas morn.*

*How easy to recall the sight of a family gathering about the tree, first for a moment of prayer and thanksgiving, and then the merry sounds, the laughter, as one by one, each opened a gift from beneath the tree.*

*This is a part of the Christmas, this turning homeward.*

*If time and distance make the "real" trip home impossible, the next-best thing is a trip down memory lane.*

**DWARF MISTLETOE**

**The Dwarf mistletoe, cousin to the mistletoe we use for Christmas decorations, is a celebrated killer of western conifers.**

**Dwarf mistletoe lives and feeds on the branches and trunks of firs, larches, hemlocks and spruces and robs the trees of nutrients.**

**Control of dwarf mistletoe is possible only with careful management. Conservationists say there is no known chemical that is a specific for the parasite.**

**Use Right Bulbs To Illuminate Outdoors**

For outdoor floodlights to illuminate Christmas displays, your best bet is to stick to the 150-watt PAR-38 bulbs. These are the weatherproof reflector type, like the kind used to light doorways.

You can get 300- and 500-watt reflector bulbs for outdoor use, but those are likely to explode in a cold rain or snow unless protected by expensive fixtures. So just use two or more of the PAR-38's when you wish more light. Indoors, you can use the 150-watt R-40 or 75-watt R-30 reflector spots and floods.
