BABSON FORECASTS

From Page 1

Cuba, in accordance with President Kennedy's demands, in return, Mr. Khrushchev will undoubtedly want some concession in the winter due to Turkey's control of the Dardanelles.

Khrushchev must placate his people at home by improving rather than reducing their standard of living. I have this very clearly when I was in Moscow. He helped Castro

So me think the Cuban factor will make President Kennedy much tougher in his negotiations with the United States, but I disagree. Labor leaders may be more reasonable in their demands, but they will continue to have friends at the White House.

LABOR AND THE PROFIT MARCH
Readers should realize that the steel workers can reopen their wage contract after May 3, 1963. The settlement of the contract will be very likely to influence other labor disputes, depending largely on international conditions.

I feel that our country is becoming "immure" to crisis, believing that the cold war will be no nuclear war within our generation, and no international war of any kind in 1963.

Labor should begin to realize in 1963 that wages finally depend upon the employer's margin of profit. The year 1962 has seen many employees close down because of their slight margin. Small businessmen—both manufacturers and retailers—must have a larger

margin of profit in order to exist. There are too many mergers into bigger units and too many failures of worthy world markets will place additional downward pressure on commodity prices in the U. S. There will be expensive in hybrid corn, soybeans, potatoes, and other selected crops. Much depends upon the weather and the ability to hold over supplies.

Price increases, apples, citrus and other fruits depend principally upon the weather. Improvements in canning, freezing, and storage have been greatly advanced, while the big supermarkets have been beneficial in stabilizing prices. The hope of the fruit growers rests in co-operative advertisements in newspapers and other media.

Certain basic chemicals will surely decline in price due to overproduction and competition from imports. The U. S. Justice Department claims to be working for consumers in its fight with many companies in 1963 as the dairy concern, but in the end supply and demand will determine the result and not legislation or court decisions.

domestic production cutsbacks for many raw materials and suppliers will continue to be upward. Now, a final word with regard to the continued price of gold. The United States will continue to lose gold on balance during 1963. The only way to prevent it in 1963 is for us to export more goods, and import less. This would require certain sacrifices on the part of our people.

Since my trip to Africa, I have concluded that the answer is to export more goods, and import less. The United States gold rather than leaving it in the hands of the rest of the world. In the free market, its production would increase naturally and it would then represent a source of gold rather than leaving it in the hands of the rest of the world. Another one may be uranium oxide.

Of course, large quantities of gold may be found on the surface of the moon—which brings me to my final subject, which I hope readers will take seriously.

GOING TO THE MOON
Nobody will reach the moon in 1963 or in 1964, but you will see more and more about it in the news during 1963 and 1964. Do not think that the United States is the only country preparing for this trip.

China and with both engines may be the first to get to the moon. China does not need to be a member of the United Nations in order to send a rocket and three men to the moon and return. China's trip to the moon may be financed by the foreign capital. China will win the territory it wants in India and ultimately get Burma.

The old saying of "going to the moon" stocks may become a very active speculation. The original booster will be paid for by some government, but their operation will be for profit. The situation may compare with our great "gold rush" having to pay the bill either through increased taxes or through inflation.

With all this promised to young people in the form of free education, college scholarships, etc., in addition to the above-mentioned help, the means of the young people, from ages 25 to 65, must carry the entire burden, sometimes they will be, but it will not be in 1963 although it might come at that time. The enactment of a "real" inclusive tax cut is no sure thing. It may look good to the "working man" but not to investors or employer.

THE UNITED STATES DOLLAR AND GOLD
The purchasing power of our dollar will gradually be kept down but that statement applies also to the same for every nation. If we devalue the dollar or temporarily keep it down by many bookkeeping, the other nations will gradually follow suit and we will end up where we started. The dollar will not be devalued in 1963, although the

Wall Street and Lombard for many raw materials and suppliers will continue to be upward. Now, a final word with regard to the continued price of gold. The United States will continue to lose gold on balance during 1963. The only way to prevent it in 1963 is for us to export more goods, and import less. This would require certain sacrifices on the part of our people.

Since my trip to Africa, I have concluded that the answer is to export more goods, and import less. The United States gold rather than leaving it in the hands of the rest of the world. In the free market, its production would increase naturally and it would then represent a source of gold rather than leaving it in the hands of the rest of the world. Another one may be uranium oxide.

Of course, large quantities of gold may be found on the surface of the moon—which brings me to my final subject, which I hope readers will take seriously.
