Tips 'N' Tidbits

BY ANN CLINKENBEARD
(For Wardrobe Dry Cleaners)

The Miracle Of Silk

As a fiber, silk is only slightly younger than wool. Several thousand years ago, the Chinese discovered that the filament of the mulberry worm had some wonderful properties. When woven into cloth, the filaments had elasticity, sheen, long wear, dyed well, and though of thinner body than wool, provided a lot of warmth.

Nowadays, of course, pure silk is not as frequent as it used to be. But for certain purposes it is still in great demand. It's elegance and resistance to wrinkling alone make it highly favored for such things as ties, scarves, etc.

Which brings us to silk finishing. This is where experienced craftsmen—such as our silk finishers—come in. Only if you know the properties of silk and have actual experience in handling it can you do a completely satisfactory job in cleaning and pressing it.

If your silk things or any thing else that needs cleaning & pressing, send them to Wardrobe Dry Cleaners.

— Call —

J. R. Chancelor
—your Wardrobe Cleaners Representative at 408-J Carlisle, Ky. for route service, or bring to 386 West Main.

ELECTRICAL SHOP

make your own weather
warm up or cool off with an electric heat pump

It's amazing. In *winter* an electric heat pump extracts heat from the outdoor air and uses it to heat your home. In *summer*, just the opposite: your heat pump removes heat from the indoor air and circulates cool, fresh air through your home.

No flames, no fumes, no soot or dirt . . . not with an *electric* heat pump. You get perfect year-'round climate control, though — and with operating costs lower than you might think.

If you're building or rebuilding, see us first for full information on modern electric heat pump "weather", to comfortize your home.
