At the request of the Board of Education, the Mercury has published this survey of school facilities in Nicholas County. The survey is a public service to the community and is intended to provide information on the status of school facilities in this county.

The survey was conducted by the Board of Education and the Mercury. It covers the five-year period from 1947 to 1952. The survey includes information on enrollment, teachers, classrooms, and other school facilities.

The survey shows that the number of students in Nicholas County schools has increased steadily over the five-year period. This increase has placed a heavy burden on the existing school facilities, and it is necessary to plan for the future.

The survey also shows that the number of teachers and classrooms has increased in proportion to the increase in enrollment. This indicates that the Board of Education has been successful in maintaining the quality of the education in Nicholas County.

The survey is a public service to the community and is intended to provide information on the status of school facilities in this county. It is hoped that this information will be helpful to the community in planning for the future.
