Feeder cattle prices are expected to improve during the next few weeks. Demand for heavyweight feeders will likely be stronger. Prices of heavy feeders may improve and more than those of lighter weight feeder cattle.

Several Extension agents and vocational agriculture teachers met at Flemingburg on Wednesday last week to make plans for the annual 4-H and FFA District Dairy Show. The date for the 1964 show is August 10 and will be in August.

Mrs. Margie Wilson, home demonstration agent, attended the meeting. Thomas Stevens, associate Extension agent, was present in Lexington last Thursday night to attend a training workshop for all Extension agents in this area.

The workshop was held to train agents on the development of Overall County Development Plans. The development of an overall plan would permit all groups, organizations, agencies and individuals to work together to combine their efforts for all markets as well as to develop an overall plan for the county.

A greater concentration of effort would result with more

eliminated by ordering plants from nurseries that have been free of this trouble.

(3) Pochontas: Most popular variety in Kentucky. High producer, does well on all markets. In a mid-season variety. Very popular.

(4) Tennessee Beauty: Not always acceptable to the processor. Has more resistance to leaf spot than other varieties. Best of late season varieties. Very popular.

(5) Surecrop: Ripens a long with Pochontas. High red-stem resistance. Good on all markets.

(6) Redneck: Ripens early. Best of the overbearing variety. Available in all areas. To the same plant. Used only for fresh market.

(7) Dixieland: Ripens about a week later than combine program. Good for fresh market but may be weak in the "BL" more yellow; some of this problem may be

participation by a greater number of growers.

Following the Lexington meeting, several county leaders met with Charlie Dixon, University of Kentucky Extension Specialist, to discuss the possibility of getting an "overall development plan" worked out for Nicholas county.

The leaders present discussed the program and voted to contact all groups and organizations and representatives in on Tuesday, March 3 to plan the program.

Present were Mr. and Mrs. Harvey Wagner, Mr. and Mrs. Dan Rich, Mrs. Wallace, John White, Willard, A. V. Allison, G. L. Custer, Jr., Norman Klair, Glenn Collins, Frank Terrell, Edna Noffinger, Mrs. Margie Wilson, Thomas Stevens, Jr. If you have questions or comments concerning the Extension office, contact one of these people who was present at the meeting.

Recommended Strawberry Varieties

(1) Earlwarden: Ripens about 5 days before the first market but may be inedible in usefulness to the grower.

(2) Dixieland: Ripens about a week later than combine program. Good for fresh market but may be weak in the "BL" more yellow; some of this problem may be

not give it a trial in your own block or community.

An invitation is hereby extended to all ladies living on East Main street to attend the next meeting which will be on March 3 with Mrs. Mary Lawrence.

Yaps—All

Washington Report

Rep. John C. Watts

Beef Imports To Be Limited

The United States Government announced that it had reached agreements with Australia and New Zealand to limit beef imports to the United States.

It was very pleased that the State Department, concerned with all international trade agreements, and the Department of Agriculture, concerned with the welfare of our cattlemen, took this action. It is a step in the right direction and certainly better than nothing, although it does not go as far as I had wanted.

Early in December, I wrote President Johnson, the Secretary of State, the Secretary of Agriculture, and the Chairman of the Tariff Commission, calling attention to the decline in the price of cattle and the impending economic disaster facing U. S. cattlemen unless the Government acted to stop the importation of beef from abroad.

The price of beef had been dropping steadily, beef cattle prices in the third quarter averaged 5 percent below a year ago.

Receipts from marketings of livestock in 1963 were down about \$50 million in the comparable period of 1962 as lower prices more than offset increased volume of marketings. For example, in November, 1962, the price of choice steers at Chicago was \$30.13, but eleven months later the price had sunk to \$24.18.

Meanwhile, while the American cattleman was suffering this decline in the price of his market, the importation of beef from abroad had increased steadily to where it totaled 11 percent of the most consumed in the United States.

And of the total amount of meat exported by all nations in the world, 20 percent was being imported by the United States.

It was thus evident that unless the Federal Government took immediate action to slow down imports, there was a real possibility that the cattleman, caught in the economic bind between increasing production costs and falling selling prices, would be forced into bankruptcy.

The effect of the announced limitation agreement is to permit Australia and New Zealand to deliver their surplus beef exports to the United States. The agreement with Australia covers beef, veal and mutton in all forms

other than canned, cured and cooked meats and live animals. The one with New Zealand covers only beef.

Also, during the next four months, the United States Tariff Commission, at the request of the Senate, will investigate the conditions of competition between domestic and imported beef.

I thoroughly recognize the need for trade agreements but I do not feel that any country should countenance free trade to the destruction of its own domestic industry.

Faced with increasing costs and lower receipts at home, the cattleman should not be plagued by unfair foreign competition flooding his own home market.

If the announced limitations do not result in improving the market for our producers, legislation may be necessary. Due to the complexities of the Reciprocal Trade Agreements Act, it is difficult to obtain passage of legislation of this type but I fully believe that Congress should act to save our cattle industry if it is in jeopardy.

John C. Alogos, of Georgetown, E. R. Freeman, Jr., and J. Marshall McCann, Jr. of Winchester; Miss Sheila Seaman, of Wilmore; Bud McClain, of Frankfort.

JUNKYARD BILL UNPHLED BY COURT

The 1962 act controlling operation of junkyards near highways is continuing

such as beautiful scenery. The object of the act was to enhance the appearance of Kentucky by banning unattractive vehicles from the highway.

The Court of Appeals ruled Friday, Feb. 14. With that decision, it nullified the constitutionality of the 1962 act imposing restrictions on junkyards near highways.

In our opinion there was a real and substantial justification for adoption of some regulatory policy with respect to the conduct of this kind of business enterprise.

Appellate Commissioner Watson Clay said that any country should countenance free trade to the destruction of its own domestic industry.

INTRODUCES MEASURE

State Senator Wilson Palmer, Cynthia, has introduced a measure (SB 80) in the General Assembly that would allow a Department of Agriculture inspector to reweigh any reasonable amount of tobacco received by a warehouse.

The inspector would determine the weight of all containers and devices used in transporting tobacco for the purpose of weighing to a warehouse.

The measure would determine the weight of all containers and devices used in transporting tobacco for the purpose of weighing to a warehouse.
