What happens when husbands take over

We don't suggest that husbands take over in the kitchen. Few can even begin to approach the ladies when it comes to preparing tasty, nutritious food.

But if men cooked many meals, you can bet there would be more and more electric ranges. That's because electric ranges make cooking a lot easier and surer. You get the same, even heat time after time so there's no more guessing about the right temperature.

It's the clean, pleasant way to cook. No objectionable odors to ruin the food. Electric ranges are safe because they're flameless!

Enjoy cooking again... and cook better... with low-cost rural electric power.

ELECTRIC RANGE

Electricity is the modern, cool way to prepare better, more tasty meals for your family. Many new models let you cook several dishes automatically. Call us or see your dealer for more information about modern, convenient electric ranges.
