Many kinds of insects find their way into the best of homes. Even the best of homes sometimes becomes infested, which is not disgrace. The disgrace is in allowing the unpleasant situation to exist after it has been known. Insect pests attack food, clothing, and household furnishings. They may also spread disease. Prevention is the best remedy, but once they're known, you should take immediate steps to destroy them since they multiply rapidly. Persistent, diligent effort on your part is necessary to prevent and control insects in the home.

The Dodge Boys won't turn their backs on you after the sale

Don't worry about anything serious going wrong with one of the new ones on Dodge.
They call them "The Dependables"—because they're real. Besides they're backed up miles. • But let's face it. New cars sometimes need little adjustments to get the "bugs" out of them. When you buy a new car from The Dodge Boys, you'll find that they'll bend over backwards to take care of any complaint you might have.
