Telephone Talk
by CHARLES A. HARRIS
Your Telephone Manager

"EVERYTHING'S FINE HERE AT HOME AND THE KIDS ARE ALL FAST ASLEEP!" How wonderful it is to be reassured like that when you're spending an evening out, and call home to check with the baby sitter. Wherever you are, at the home of a friend or having a night out, there's always a phone close by. Go anywhere at all . . . it's easy to keep in touch with those you love, by phone.

• • •

OPERATING AT 2,400 WORDS A MINUTE, Data-Phone® Service is revolutionizing business communications! This exciting communications service, developed by Bell Telephone Laboratories, speeds information, drawings, charts, photographs, etc., to distant places in minutes instead of days.

Here's an example. A supermarket's inventory of over 7,000 items can be sent by Data-Phone Service in eight minutes. The same list, printed single space, would be about 100 feet long and take hours to read aloud over the telephone. This is just one of the ways information can be transmitted quickly, accurately, from one Data-Phone set to another. New, and specially constructed equipment uses Data-Phone Service to transmit heartbeats which are recorded on an electrocardiograph at a distant location. This makes it possible to diagnose illness even when patient and doctor are in different cities!

• • •

"Question: "Doctor, do you get many Long Distance phone calls from your patients?"

Answer: "Very few. I'm a veterinarian."

HELPING THE VOICELESS TO SPEAK! This is the job of the Bell Telephone Company's new electronic larynx. Especially developed for people who have lost use of their vocal cords, the device is easy to use, needs little maintenance. When the user presses the larynx against his throat, vibrations form sounds very much the way they do in normal speech. It is battery-operated with a simple hand switch and comes in two models: high pitch for women, low pitch for men. The electronic larynx is available from your telephone Company on a non-profit basis. This, and other helps for the handicapped, are developed by the Bell System as part of its nation-wide program of public service. If you know someone who could use the electronic larynx, why not call us for more information.

Trots Thru June 13

The spring harness race meeting at the Lexington Trots reached the halfway mark Saturday with the almost-routine announcement that another attendance and mutuel handle record had been set for the week just completed as an average nightly poured better than $64,000 into the wagering windows.

These figures represented increases over the second week and a large percentage rise over 1963.

Out-of-town fans have contributed to the increases to a large extent as more than 39 per cent of the audiences drive in from 32 counties. The winner of the largest twin double in Kentucky history, $3397.20, came from Lexington proper but next in line was a young couple from Grayson. Mr. and Mrs. Ralph C. Hall, who happily carried $2980 home on May 12.

Good weather has blessed the meeting thus far

"KENTUCKY'S FINEST ONE NIGHT SHOW"

Mustang leads the stampede the big Ford started. This has been the hottest sales year in Ford Division history. We have a winner in the Super Torque Ford, a car so well built, so predictably tough, that competition-modified Fords took eleven of the last twelve NASCAR 500-mile races. Ford sales are up 17% this year. We have a luxury car that's taken off like a skyrocket: Thunderbird, with sales up 68%. Falcon is selling almost as many cars as Valiant and Chevy II combined. Fairlane continues to be a favorite in its own field. Now comes Mustang . . . turning the trend to Ford into a downright stampede. Mustang, by any measure of sales or excitement, is the most successful new car ever introduced in America—ever. When you see a stampede, it makes sense to find out what started it. That's something only your Ford Dealer can tell you about.
