**THIS STORY PROVES YOU CAN'T STOP A TELEPHONE MAN WHEN HE'S GOT A JOB TO DO!** In Florida a very special telephone installation had to be made which meant going telephone lines across an impassable swamp. The installer fastened a fishing line to a telephone line, and the fishing line to an arrow, then shot the arrow across 350 feet of swamp. He went around to the other side of the swamp, pulled the telephone wire across attached to the fishing line, and finished the installation. Which also proves there's an answer to every communications problem that folks in the phone company will find it.
