

McNeill Member Korean Team

Peter T. McNeill, Jr., Director of the Member Service Department and Assistant of Fleming-Mason REC, an employee of the electric Co-op since January 1959, has been selected

as a member of a National Power Survey Team for Korea. Mr. McNeill received a leave of absence from the Fleming-Mason REC on September 1, for a period of four months.

After a period of orientation, the team will fly to Korea where studies will be made preparatory to setting up a program for the development of electrical power in that country. At the present time, the electrical situation in Korea is very similar to that of the United States when the Rural Electrification program was created in 1935, with only one fourth of the country having electric power. Only 6% of the rural area have electric service.

Since electricity is a fundamental part of economic and social development, the team will explore the possibilities of extending the many types of cooperative promotion, financial aid, technical assistance and local ownership and control to Korea. Similar studies have been made in South and Central America and Mexico. An exploratory survey in Korea was made recently by the National Rural Electric Cooperative Association and its General Manager, Clyde T. Ellis.

The selection of Mr. McNeill as a member of this committee is a rare and highly deserved honor. Mr. McNeill has had intensive training in rural electrification and has a wide range of experience in rural economics. He will serve in the capacity of Rural Area Economist on the nine man team. In accepting the assignment, Mr. McNeill will be doing so at some personal sacrifice but will be rendering a great service to his country and to a cause to which he is devoted.

Mr. McNeill is a native of West Jefferson, Mo., and has resided in Fleming County since 1953. Prior to joining Fleming-Mason Co-op, he served as County Agent for Fleming County and was actively engaged in farming operations. He is a member of the Chamber of Commerce, the Farm Bureau, and the Association of Electrician-Association of Electricians, the Fleming County Extension Council, Conference at Lexington

4-H Council, former District Chairman of the County Agent's Association and former vice-president of the Farm Bureau, a member of the Library Board and Fleming County Red Cross Blood Donor Chairman.

He is Past President of the Methodist men and is now serving as Lay Leader of the Mayville District and Superintendent of the Sunday School of the Fleming-Mason Methodist Church. He also served as Co-sponsor with the U. S. Navy during World War II in the South Pacific.

In 1962, Mr. McNeill received one of the outstanding citations offered in Fleming County... that of "Outstanding Fleming County Citizen of the Year," based on votes received in the annual contest conducted by a Fleming-Mason newspaper.

Mr. McNeill and his wife, Mrs. McNeill and his wife, the former Anna Lou A. and Pop Clark, Her father, Harry Trapp, is the camp manager at the new district 4-H camp just north of Carlisle.

D. Booth, son of Mr. and Mrs. Glenn Booth, has been very active in the 4-H dairy, swine, and pony projects. He exhibited his dairy heifer at the District 4-H Dairy Show at Fleming-Mason Co-op Youth Fair last week. He also participated in archery and bowling and was very active in camp activities. He takes an active part in scouting and Conservation Club work. A very outstanding thing about him is his regular church attendance at the Carlisle Christian Church. He has a perfect Sunday School attendance record for the past eight years. He helps raise money for community groups—Red Cross and Heart Fund.

D. W. has completed three projects this year—dairy, swine, and horse and pony.

Both D. W. and Carolyn have assisted in helping raise money for the District 4-H Camp and are to be commended for their accomplishments and achievements during the past year in 4-H Club work.

179 FRESHMAN ENTER UK MEDICAL CENTER

One hundred and seventy-nine new students begin studies at the University of Kentucky Medical Center this month. The College of Medicine received 64 men and 14 women as members of the class of '68. Forty-nine men and one woman entered the Dental College. The College of Nursing received 51 women this fall. The College of Medicine and the College of Nursing admitted their fifth classes and the College of Dentistry admitted its third.

Two 4H Members Receive Awards

Stewart Moore, local Co-op Oil Distributor, presented Carolyn Trapp and D. W. Booth watches at the 4-H Achievement Program last week as awards for being the outstanding Fleming-Mason Co-op Youth Fair exhibitor. The awards are based on active participation in 4-H activities and projects and activities in other clubs, school programs and church work. Carolyn participated in all 4-H activities this year. She was selected a delegate to the Chamber of Commerce Association of Electricians, the Fleming County Extension Council, Conference at Lexington

S. C. Report

From Page 1

at least ten years.

We co-sponsored with Robertson County Soil Conservation District, our first joint cooperators' meeting last August at Blue Licks State Park. J. O. Matlock, State Commissioner of Conservation, was guest speaker. He presented an illustrated lecture concerning equipment usage, tank formations, and Grant and Matching Funds from the State of Kentucky.

In the promotion of Soil Stewardship Week, we furnished reference material to ministers. We supplied a minister to conduct a radio program related to Soil Stewardship Week.

With the cooperation of school officials, we sponsored a Soil Conservation Day Contest. We contributed approximately \$80 in prizes which included an aerial conservation tour over the county for the winners of the three best essays.

We purchased a Palorad Carver for use in the promotion of Soil and Water Conservation and for other related worthwhile community activities.

We supplied flag markers for use by SCS personnel in engineering survey and layout work in conservation.

We donated \$25 to the North Central 4-H camp

project. We contributed prize money to the Nicholas County Youth Fair, sponsored by the Utopia Club. We contributed money for prizes to the Jayce Horse Show.

We employ a part-time secretary, Doris H. Whaley, to do our clerical work and to assist SCS personnel in their mounting administrative duties.

Funds to carry out our activities come from the fiscal court contributions for equipment usage, tank formations, and Grant and Matching Funds from the State of Kentucky.

Conservation in the District Forty-three new cooperators requested help in conservation work and signed agreements with the District (171) different cooperators.

The USDA Soil Conservation Service representatives, William F. Threlkeld, Lucien T. Robinson, and Stanley C. Alexander, give technical assistance to farmers in the planning and application of conservation work. SCS personnel work in this and Robertson County.

The Extension Service with its County Agent and Home Demonstration Agent has furthered the cause of conservation with their educational programs and cooperative tours and demonstrations.

The Vocational Agricultural Department of the consolidated high school promotes soil and water conservation through its teaching. School officials and teachers cooperate in promoting the Soil Conservation Essay Contest. Three hundred and ninety-eight essays were written by students last year. Financial assistance to cooperators was provided by the Farmer Home Administration and other lenders.

Clergymen supported Soil Stewardship Week by delivering sermons and conducting educational programs.

The Carlisle Mercury, a local weekly publication, devotes valuable space to news articles and pictures depicting soil and water conservation. As a means of informing the people and promoting the adoption of conservation measures, their service is indispensable.

The Agricultural Conservation Program provides financial assistance to cooperators in the purchasing provisions of the program.

The conservation of fish and wildlife is promoted by Harry Duncan, Conservation officer and his Jr. Conservation Club.

Summary

The conservation of our natural resources has been possible through the efforts of individuals and many cooperating agencies.

Respectfully, Chairman Nicholas County SCS Board of Supervisors

Newell Adams, chairman

Frank Farley, secretary-treasurer

Charles Whaley, member

Howard Sells, member.

drainage with more than a mile of pipelines to supply water to 26 livestock watering tanks and the establishment of thousands of acres of improved pastures and meadows.

In consultation with the SCS, ACSR Extension Service, etc. the adopted agricultural conservation program is designed to stimulate pasture and hay establishment. This is needed to support the expanding livestock population.

Cooperation and Assistance of Agencies

Coordinated effort is necessary in the fulfillment of conservation goals. Many agencies meet jointly for the purpose of determining some of the conservation problems how best to solve the problems, and who will help get the job done.

The USDA Soil Conservation Service representatives, William F. Threlkeld, Lucien T. Robinson, and Stanley C. Alexander, give technical assistance to farmers in the planning and application of conservation work. SCS personnel work in this and Robertson County.

BELOW members of the Nicholas County Volunteer Fire Department demonstrate the pumping power of their unit. Capt. Reid explained the use of the gas main, axe and fire extinguisher at the school held Sept. 3. Classes were held again on Tuesday night, Sept. 8, and will be held tonight, Thursday, Sept. 11. --Mercury photo

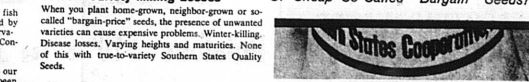

FARMERS—

Want to Stretch Your Seed Dollar?

Read How YOU SAVE MONEY WITH SOUTHERN STATES Quality SEEDS

- **Pay Less For Pure Live Seed**
Southern States Quality Seeds cost you far less in terms of seeds that can grow to be harvested. Don't pay seed prices for trash such as sticks, straw, other-crop seeds and weed seeds.
- **Cut The Cost Of Weeds**
It costs you money to fight weeds carried to your fields by inferior, improperly-cleaned seeds. With Southern States high-purity Seeds you cut the cost of spraying and cultivating and get big yields from clean fields.
- **Economical Lower Planting Rates**
The low germination of inferior seeds forces you to step up the planting rate. So where's the saving? With high-germinating Southern States Seeds, you use recommended planting rates. You save seeds and money.
- **Crops Cost Less To Produce**
The bigger yields you make with Southern States Quality Seeds result in lower production costs. You pay less to produce a ton of forage or bushel of grain than with inferior seeds. You're dollars ahead.
- **Avoid Variety Mixing Losses**
When you plant home-grown, neighbor-grown or so-called "bargain-price" seeds, the presence of unwanted varieties can cause expensive problems. Winter-killing, disease losses. Varying heights and maturities. None of this with true-to-type Southern States Quality Seeds.

When The Best Seeds Actually Cost You Less, Why Gamble With Home-Grown Or Cheap So-Called "Bargain" Seeds?

To Save More And Make More, Order Your Southern States Quality Seeds Now
