Who are his silent partners?

That electric milker is a profitable partner . . . it permits one man to do the work of eight.

His other silent partner is equally important for it lets him earn *more profit* on every hundredweight of milk. And it adds only pennies to over-head.

You guessed it. An electric hot water heater enables you to up-grade your dairy rating and increase profits without noticeably increasing your over-head or feed costs. With plenty of hot water, it's easy to keep everything spic and span. No problem with sanitation requirements, either.

A hot water heater is more than a smart investment. It means more *profit*. It means more comfort and convenience for your family, too.
