QUARTER BILLION DOLLARS A YEAR

Cattle worms cost Ameri- can cattlemen an estimated quarter billion dollars a year, according to several college reports. The pre- sence of cattle worms is sel- dom suspected until serious damage has been done. It is assumed that your cattle are infested by worms that to assume they aren't infested, since even apparently healthy cattle can be suffering from worms. Even a light burden of worms can rob animals of vitality and blood. A heavy burden will result in a marked reduction in weight gain, decreased feed efficiency and nerve strain.

KEEP UDDERS CLEAN & HEALTHY

Yes, mastitis is more easily spread at milking time. It is essential to keep udders healthy and produc- tive. Any damage to the cut, should be treated with Purina Ulcer Ointment—a medicated ointment in a soothing, skin softening lanolin base. It is recom- mended as an effective first aid treatment for chap- ped and cracked teats to help prevent infection and aid in healing. See our product literature for more information.
