Out-of-State, one year . . . \$4.00

Against Coercion

These Senators who—against most of the predictions—prevented repeal of the section 140(b) of the Tax-Hartley Act, which authorizes the states to enact "Right-To-Work" laws if they so choose, were not the usual unions. They were against coercion. Senator Dirksen said: "... it is a more fundamental right than the right to make a living for one's self and for one's family without being compelled to join a labor organization." Senator McClellan said: "It is not a wage earner, I might well be inclined to join a union. But I would want to have the choice. I would not want to be compelled to join. I have no real sense of it. I do not have the feeling of dedication to fundamental rights."

A Far Worse Killer

Soil Sampling Necessary, Beneficial

Farmers have a breathing spell now, the summer crop work mostly behind. The means soil sampling can be done now. This will pay dividends next spring and summer, when work loads are high. Here are some reasons for fall sampling, from Harold F. Miller, U.K. Extension Service specialist:

- 1) Soil is ideal now for sampling, the technician has more time for analyzing it and the county agent more time to study recommendations.
- 2) If lime is needed, it can be applied while ground is firm. Since limestone reacts slowly, the material from fall applications will have winter months to start reacting.
- 3) When fertilizer needs are known from samples, the farmer can order the materials can be ordered from the dealer.
- 4) Fall soil sample results do not vary enough from spring samples of the same ground to justify the difference in fertilizer recommendations.

What is a far worse killer and mauler than war? Answer: The slaughter on the nation's highways. In the 1900-1964 period, according to U.S. News & World Report, 576,228 Americans were killed in wars and 978,640 were wounded. In the same period, by way of contrast, traffic fatalities claimed a total of 1,501,000 dead and 23,850,000 injured.

The magazine article went into details concerning the murderous record we are running up on our streets and highways, the causes of the carnage, and what can be done to help remedy matters. There is ample evidence that the demand for corrective action is growing fast. President Johnson has said that: "We cannot accept the intolerable drain on our human and economic resources that the problem, said, 'It is time we mobilized our defenses against this national safety.' And, reported U.S. News, "All across the country there are sounds of alarm." All manner of groups are demanding that the state take action.

New Year resolutions we wish every Kentuckian would make.

If there is not enough machinery storage space under roof, utilize equipment such as plow, disc, etc. stored out of doors after they are thoroughly cleaned, painted, and the metal parts greased.

The farmer's share of the consumer's farm food dollar is expected to average 39 cents this year. In 1965, this is the largest increase since 1951-1952 when it averaged 38 cents. In 1961, it dropped to 37 cents. In 1962, it rose to 38 cents. In 1963, it was 39 cents. In 1964, it was 39 cents. In 1965, it is 39 cents.

Local Business
Advertising Increases Nearly Billion Dollars
An estimated 15 billion dollars was spent for advertising in the United States during 1965. This is an increase of nearly one billion dollars over 1964. The annual increase in advertising has been approximately the same for the past decade. The increase has been closely related to the increase in the national product—the overall worth of goods and services produced by the nation.
