**THE PIG FACTORY**  
A sow is a pig factory. She has the big job of producing and nursing two litters of pigs every year. Like any other factory, she has to have raw ingredients to produce the product (pigs) and maintain the factory (her own body). If she doesn't get proper nutrition she may actually reabsorb some pigs into her system, causing you to lose pigs you'll never even see, or she may farrow weak, unthrifty litters. With pig prices at a 10 year high this could be 225 lb. hog or \$25.00 return after paying for the feed from 40 lb. to market. If hogs sell for 25¢ then you would get \$5.60 instead of \$14.00! Let us talk over your OPPORTUNITY to increase your PROFITS. It is possible we can carry the feed bill till you sell the hogs. See us today.
