

Late September, October, and early November are excellent times to spray established lawns for broadleaf weed control. Some of these weeds are plantain, dandelion, and groundivy. The whole range of broadleaf weeds is considerable. Materials recommended are those with active ingredients such as 2, 4-D, 2,4,4-T, silvex, or Banvel-D. They are sometimes individually, or in combination, they are sold under various trade names. They have

### Broadleaf Weed Control in Lawns Is Chore Now

very little effect on germinating seeds, which is why they should be applied as foliage treatments. Follow label directions carefully for amounts. Dr. Herron emphasizes. Spray treatments recommended here also are for established lawns, not for new seedings. Using these materials during autumn lessens the danger of volatile vapors drifting onto ornamentals. Spot treatments probably will be needed again the following spring. Some weed seed remain capable of sprouting for several years.

### Social Security ?'s

What do you know about social security and how it affects you, the modern American woman? The Social Security Amendments of 1965, recently signed into law by President Johnson, make several changes in the social security law as it applies to women. Here are the most important changes and what they can mean to you.

A widow may now elect to receive social security benefits as early as the age of 60. These benefits will be reduced to take account of the longer time they will be paid (an actuarial reduction).

A divorced woman may now receive wife's or widow's benefits under the following conditions: If she was married to her former husband for at least 20 years; if she has been receiving at least one-half of her support from her former husband (or there is in effect a written agreement or court order for substantial contributions); and if her former husband had worked long enough under social security.

A son or daughter of a retired, disabled, or deceased worker may now receive child's benefits up to the age of 22. If he or she is unmarried and a full-time student. The mother of such a student, however, will stop receiving mother's benefits, just as before, when her youngest child reaches age 18 unless he has been disabled since before age 18 or marries.

A widow 60 or over whose benefits have stopped because she remarried may now receive benefits under deceased husband's account (in the amount of 50 per cent of his benefit) even though she is married again. If she is entitled to benefits on her new husband's account, she will receive an amount equal to the higher of the two benefits. And if the second marriage ends, she may receive her original widow's benefit again.

Women 72 or older who were not eligible for benefits under the old law because they or their husbands had not worked long enough under social security, may now be eligible for a special monthly benefit based on a shorter period of work. Some of these older women will be eligible for social security because they worked for a few months themselves; others may be able to receive wife's or widow's benefits based on their husbands' work.

Waitresses, beauticians, and other service workers who receive at least \$20 in cash tips during a month will be able to get social security credit for that income beginning in January, 1966. The new law requires that tips amounting to \$20 or more in a month be reported to the employer, and that the social security tax on them be paid.

Information on all of these changes in the social security law is available at your Social Security Office. The Lexington, Kentucky office is at 930 Winchester Road, telephone number is 254-7080, extension 7681.

**313 days to apply limestone**  
Weather permitting, there are 313 days in every year to lime the land, the other 52 are Sundays. That's just another way of saying when a farm needs liming the thing to do is to put it on no matter what season of the year it is.  
A few years ago most farmers spread their lime, now they are liming their soil throughout the four seasons. Much of it is being applied to soil ground any time after haying and before plowing for the next crop in the rotation.  
We stand ready to serve you throughout the year, except on Sundays.  
The new fine AGRICULTURAL LIMESTONE IS NOW AVAILABLE!
