## 10 Key To Happier Human Relations

A recent issue to "Fayrus" lists them as follows:  
Speak to people, There is nothing as nice as a cheerful word of greeting. Smile at people, it takes 72 muscles to frown—2 to smile.  
If you would have friends, be friendly, be cordial, speak up and act as if everything you do were a genuine pleasure.  
Be genuinely interested in people. You can like everybody if you try. Be generous with praise—evaluate with criticism.  
Be considerate with the feelings of others. It will be appreciated.  
Be thoughtful of the opinions of others. There are three sides to a controversy—yours, the other fellow's and the right one.  
Be alert to give service. What counts most in life is what we do for others.

## Motorola 23" Color

Motorola's new rectangular picture tube is over 2" shorter than conventional round color tubes, so the tube cap on the back of the cabinet doesn't stick out so far. This means a Motorola Color TV won't leave a big gap between the cabinet and the wall.

## Everybody benefits when Rural Electrics give life to democracy

Democracy like people, gains strength from exercise. When Americans engage in political debate and vote in free elections they breathe new life and vitality into the democratic process.

America's rural electric systems provide a continuing example of how democracy flourishes in one sector of the electric power industry. Each year its hundreds of meetings all over the country for the members of cooperative and other consumer-owned systems meet to review... to discuss... to deliberate and to cast their votes in accordance with cooperative tradition and democratic principles. These member-consumers have the final say in the policies and direction of these business enterprises.

Rural electrics were created in the democratic tradition by the people they serve to bring light and power to rural America. And they are keeping pace with continually growing power requirements with the help of Rural Electrification Administration loans which are made with interest.

Working with their government to meet the nation's needs, rural electric systems give democracy a lift and everybody benefits.

### Telephone Talk

by Your Telephone Manager CHARLES A. HARRIS

SQUIRRELS OF THE WORLD—UNITED! New England squirrels suddenly started climbing telephone poles and eating the cable! After much consultation, the New England Telephone Company started wrapping the telephone poles in ten-foot-high sheets of aluminum. The squirrels couldn't climb the slippery poles, and had to start dining elsewhere. Which just goes to show the telephone company will go to almost any length to protect your telephone service!

KENTUCKY STATE FAIR. We invite you to stop by the Southern Bell Telephone Company booth at the Kentucky State Fair August 18-27 in Louisville. We have an exhibit which we are sure you will find both interesting and informative.

COOKS TOUR... These days when so much of our food is frozen, it's important to know how long it will last in a freezer and still be edible. Here are some suggested time periods. They may vary a little depending on how food is wrapped before freezing, the condition it's in, and the consistency of the temperature.
