

### Deaths

**Charles Edward Hammonds**  
Charles Edward Hammonds, infant son of Mr. and Mrs. Fred Hammonds, Route 5, Carlisle, died at birth on March 7 at Nicholas County hospital.

**Milton T. Prebble**  
Milton (Pete) Thomas Prebble, 49, of Cynthiana Route 4, a farmer and supervisor for the Hinkle Contracting Corporation, died at 3 p.m. Monday, March 14, at his residence, apparently of a heart attack. He was a native member of the Carlisle Methodist Church.

Survivors are two brothers, Sam and Albert Hollar, Millersburg and several nieces and nephews.

Services were conducted at 2:30 p.m. Saturday at Mathers-Shearer Chapel by the Rev. James Norworthy, burial in the Carlisle Cemetery.

Deacons were Paul Winsor, Oliver Vice, Calvin Minton, Ray Caswell, Raymond Hall and Willie Boaz.

**and visualize well known Carlisle men and women in the rolls of Yashti, the queen, King Ahanuray, Mordecai, the Jew, his beautiful daughter Esther, and Haman, who hoped to hang Mordecai, but who hanged himself on the gallows he had meant for Mordecai.**

These and similar entertainments provided breaks in the routine of winter life for both adults and kids.

In the summer there were picnics, the John Robinson Club, swimming holes, fishing, and ball games. Ball games were of special interest to young and old. The game between the Hepecks with Perry McClanahan playing first base barchanded, and Jim Minogah at second for the "Hepecks" with R.B. Russell as Umpire, was an enjoyable exhibition.

For kids it was fun to be a part of it all. It was fun to meet the evening seven o'clock train and to await the distribution of the mail afterwards at the Post Office. It was fun to visit the L. & N. freight office and watch the loading of a ton of lumber from the pens back at the depot, and the loading of hogheads of prized tobacco from Dudley's warehouse. It was fun to watch the switching of freight cars, and the watch and listen to the breakman unloading package freight from the "Way cars" to the depot platform. It was fun to watch Betty Stewart at the Western Union telegraph key receiving election returns. It was fun to drive the family horse and buggy to Parks Ferry, to smell the odor of freshly sawed lumber stacked along the railroad siding, and to watch the sawing of the logs, then to cross Licking River on the ferry, or ford it if the water wasn't too high.

Finally, it was fun to attend Camp Meeting at Parks Hill, and on Sundays go down to the gate and watch the great Sunday crowd come in from the several special trains which laid over for the day along the track all the way to the water tank. Along with the came baggage loaded with men, women, and children with great picnic baskets of food to enjoy with friends from near and far.

From all this it may be rightfully agreed that the joy of a kid got out of life as a kid long ago, developed largely when he was put into it, and that holds true today.

**Baking, broiling, boiling, roasting... with flameless electricity, you get the "full range" of cooking pleasure!**

**Nicholas Memories**  
Louvville; a son, Billy R. Prebble, Lexington, his mother, Mrs. Lucy Prebble, Harrison County, a sister, Mrs. Dennis Bishop, Paris; a brother, Chester P. Prebble, Harrison County, and three grandchildren.

Don't miss these events of the Band Boosters Pantomime Show on March 31 and on April 1 and 2, presenters to be a rib-tickling, side-splitting number. The "girls" are Ralph Shearer, Dave Zachary, Jack Conley, and Joe Hout. Eleanor Talbert gets with "Second Hand Carl." Nobody can do it like Eleanor can. Lillian Morrison, show director, is sure to make the audience homesick, or maybe just plain sick, with "I Love Paris" and "Bill Bailey Won't You Please Come Home." Virginia Vice pleads "Dance With Me Henry." How can Vice resist?

Give your family all the benefits of the "full range of cooking pleasure" — a modern electric range. See your dealer.

WELL HELP PAY FOR WIRING if you change from 2 wire to 3 wire, 100 ampere service, and install an electric meter, we'll pay 15% on your wiring bill. If you have 3 wire service and install an electric meter, we'll pay 15% on the additional wiring needed. Offer good to March 31, 1966. See your KU or GMC manager for details.

**a special message to you who have WALNUT TREES**

The George E. Tomlinson Company has been specializing in Black Walnut for over forty years. We truly appreciate good walnut timber and the landowners who produce it. In our organization we have men with many years of training and experience in Walnut production. If you are serious about Walnut trees as a valuable crop, we would like to make our services available to you. Should you have any questions concerning the planting, growing and cutting of Walnut trees, feel free to contact us.

We are always interested in buying Walnut trees. You can be sure that we will advise you honestly and correctly as to what should be cut and how it should be done to your advantage. Since we are concerned only with Walnut, you can depend upon us for the HIGHEST PRICE and the BEST SERVICE, including supplying seedlings to replace trees cut without cost to you. Your Walnut trees are a valuable crop... be sure of the people you work with and sell to!

Write or call our salaried buyer in your area who will contact you without delay.

MAGNOLIA ST. • WINCHESTER, KY. TEL. 744-4111

Exposing stored grain and seeds to radio-frequency (RF) electric fields creates a kind of "death ray" for insect pests that may eventually be an alternative to fumigation.

Insects die after RF treatment probably because the energy they absorb from the electric field causes internal heating. But precisely how this happens has yet to be scientifically explained.

Although RF treatment is as effective as fumigation, it now costs more than three times as much — 3.5 cents compared to less than 1 cent per bushel. Scientists are trying to find ways to reduce the cost.

In recent experiments, the scientists tested RF energy for controlling seven insect species of ten found in stored wheat, rice, corn, and flour. These insects were rice weevils, grain borers, red flour beetles, confused flour beetles, cadellars, and dermestids.

They found that higher RF field intensities usually increase the total number of insect deaths. Presumably, the kernel itself provides some protection at this stage.
