

BKG One of Seventy-Six New Plants To Be Recognized

Frankfort — Manufacturing firms which announced new plants for Kentucky locations last year will be honored at Governor Edward T. Breathitt's "Industry Appreciation Luncheon," set for April 11 at the Sheraton Hotel in Louisville.

The list of firms and the locations they selected for the seventy-six new plants announced in 1965 includes the Blue Grass Knitting, Incorporated, Carlisle. Officials of all the firms have been invited to attend the luncheon. They will be presented with certificates of appreciation from the State and the Kentucky Chamber of Commerce for "contributing to continuing growth and prosperity" of Kentucky.

The luncheon will be the highlight event of "Industry Appreciation Week," set in a proclamation by Governor Edward T. Breathitt for April 11-16.

Farmers of Nicholas County and business people of Carlisle are to be congratulated for their fine spirit of cooperation. Each is dependent upon the other. Agriculture is the largest single industry in the County. These farmers spend a great deal of money in town for supplies and equipment. Several events are held each year in an attempt to draw these segments closer together. Let each of us do what we can to maintain and even improve these relationships.

In June 1965 a production potential study in commercial farming in Kentucky and in each of our Counties was completed. The purpose of this study was to discover the agricultural production potentials for commercial farming in the state. Basic consideration was given to good land use, efficient farm organization, good management

les R. Carter, vice president, and Miss Fret Allison, secretary. Mrs. Fannie Bush Smith led the assemblage in The Pledge of Allegiance and Mrs. Randle Flowers led in the singing of "America the Beautiful". Chairman Wilson gave a message pertaining to the flag and its meaning. He also thanked the Kentucky Utilities for their assistance in the flag raising and the P.T.A. for the donation.

The potential study for Nicholas County showed most of our increased income should come from the livestock improvement in the quality of their livestock. This also adds to income of most farmers.
