**IF** is a big, sad little word but it shows the way to Better Times ... for You

No other word than "if" starts off so many hard-luck stories. No other word explains so many failures. Yet it's the backward-looking word which crystallizes our experience . . . and when used as a guide, enables us to look forward with more wisdom.

For example, we might say "if every dollar of local money that has been needlessly spent outside of this trade area in past years had been spent at home, those of us who live in this community would be more prosperous, happier and more secure."

**Better Times ... for You**

is a big, sad little word but it shows the way to Better Times ... for You

No other word than "if" starts off so many hard-luck stories. No other word explains so many failures. Yet it's the backward-looking word which crystallizes our experience . . . and when used as a guide, enables us to look forward with more wisdom.

For example, we might say "if every dollar of local money that has been needlessly spent outside of this trade area in past years had been spent at home, those of us who live in this community would be more prosperous, happier and more secure."

And thus contemplating what might have been . . . if . . . we can make our plans and our resolutions to avoid the costly habits we have let ourselves take up in the past.

We can see more clearly how a dollar here and a dollar there . . . saved from dribbling away into the economic life-stream of some other community, will soon add up to brighter and more prosperous times . . . for us and our children, and for our friends and neighbors.
