Telephone Talk
by Your Telephone Manager
CHARLES A. HARRIS

RESEARCH FROM BELL TEL. LABS HELPS SAVE LIVES! In the Optical Device Department at Bell Telephone Laboratories, scientists have developed a type of continuously operating argon laser which promises to have important medical benefits. The laser, a concentrated and highly powerful beam of light, has already been used successfully as a "light" knife in performing bloodless surgery on cancerous tumors. Telephone people don't just work on improving our telephone service; they work on improving many areas of our lives.

IF THERE'S SOMEBODY IN YOUR HOUSEHOLD—an aunt, a grandchild, or whoever—whose last name is different from yours, friends may have difficulty in locating her in the phone book. Have you considered an extra listing in the directory? The cost is small, and the convenience is immeasurable.

A MAN WITH A NOVEL APPROACH TO THE MEAL PROBLEM is eating his way through the Yellow Pages of the Manhattan telephone directory, restaurant by restaurant. Several years ago he turned to the Yellow Pages to find a good restaurant and happened to pick one whose name began with "A." That started it; he's now somewhere around the middle of the listings and expects to reach his last "Z" meal in the year 1980, some 5,000 restaurants later.

And, speaking of eating... Thanksgiving is almost here. Your friends at Southern Bell join in wishing you and your family a wonderful holiday... and we hope you have many things for which to be thankful.
